

TO: JAMES L. APP, CITY MANAGER  
FROM: BOB LATA, COMMUNITY DEVELOPMENT DIRECTOR  
SUBJECT: INTERIM SPACE FOR BUSINESSES DISPLACED BY THE  
DECEMBER 22, 2003 EARTHQUAKE  
DATE: FEBRUARY 3, 2004

Needs: For the City Council to consider a report regarding the demand for interim space to serve businesses displaced by the earthquake of December 22, 2003.

Facts:

1. The December 22, 2003 earthquake inflicted significant damage to a number of structures in Downtown Paso Robles.
2. Attached is the latest "red tag" list of structures that cannot be occupied as of this date. Also attached is the latest list of "yellow tag" buildings that can have limited occupancy.
3. The number of structures that cannot be safely occupied has been reduced since December 22, 2003.
4. Anticipating that there may be a need for interim space to operate businesses, contact was made with Santa Cruz and Fillmore, communities that have had past experience with earthquake damage and displaced businesses. In both instances, the communities experienced damage more severe than in Paso Robles.
5. Information was also gathered from the State Main Street office and also from various vendors who could supply interim space for business operations.
6. Within the last three weeks, a survey was taken, seeking to quantify the extent of demand for interim space. A copy of the survey results is attached.

Analysis  
and

Conclusion: Based on advice from the State Main Street program, it is very important to maintain the cohesiveness of the downtown business community. Keeping displaced businesses downtown benefits the remaining businesses, as well as the customers.

In follow-up to the December 22, 2003 earthquake, a number of businesses were temporarily displaced and have since been able to reoccupy their former buildings.

With the exception of two major structures (the Blackburn/Clock Tower and the Marlow/Camera Corner Buildings), it may be feasible to repair most of the balance of the commercial buildings in the foreseeable future.

Since the attached survey of space needs was conducted, at least two of the listed businesses have found interim space or are in the process of negotiating arrangements.

There are also some indications that additional business space may be created by one or more large space users moving out of the downtown, leaving room for smaller retailers.

Based on the most recent information received, it would not appear necessary to have the City step in and provide interim space for businesses. If, however, the City Council receives information that is inconsistent with this conclusion, staff would be prepared to present interim space options for Council consideration.

Policy

Reference: City Council responses to the December 22, 2003 earthquake.

Fiscal

Impact: None, unless the City Council wishes to pursue providing interim space. If the City becomes involved in providing interim space, costs would be directly proportionate to the size of facilities provided. Initial indications are that the City could not obtain Federal Emergency Management Agency (FEMA) reimbursement, but CDBG funds could be utilized for this purpose.

Options:

- a. That the City Council receive and file this report.
- b. Amend, modify or reject the foregoing option.
