

TO: JAMES L. APP, CITY MANAGER

FROM: RON WHISENAND, COMMUNITY DEVELOPMENT DIRECTOR (P)

SUBJECT: ZONING MAP AMENDMENT 07-001 (CITY INITIATED)
4th AND SPRING STREET MASTER PLAN AREA
(APNS 009-291-008 THROUGH -018)

DATE: APRIL 3, 2007

Needs: For the City Council to approve a Zoning Map Amendment for property within the 4th Street Master Plan area to be in conformance with the General Plan land use designation.

- Facts:
1. The project area is located at 4th, Spring and Pine Streets, see attached Zoning Location Map.
 2. The current property zoning includes properties with portions of the area that are zoned Manufacturing Planned Development (M-PD) and Commercial/Light Industrial Planned Development (C3-PD). The General Plan Land Use Designation of these properties is Commercial Service Mixed-Use Overlay (CS M-U). The City is proposing to rezone the subject properties to Highway-Commercial Planned Development with a Mixed-Use Overlay (C2-MU), to provide consistency between the Zoning Map and Land Use Map.
 3. Surrounding land uses include a mix of commercial and residential properties.
 4. The City is currently collaborating with the property owners to prepare a Master Plan for a large-scale mixed-use development project. The Master Plan will be coming forward to the City Council in May 2007.
 5. The rezone was reviewed by the Planning Commission on March 13, 2007, and was recommended for Council approval.
 6. Per the California Environmental Quality Act (CEQA), an environmental review was conducted since the rezone is a legislative act. No significant environmental impacts were identified that may result from this project. Therefore, a draft Negative Declaration has been prepared.

Analysis
and

Conclusions: As noted above, the application includes a request to rezone properties to be consistent with the commercial and mixed-use land use designation of the City's General Plan. Also noted, is a reference to the preparation of a Master Plan for the subject properties. The Master Plan is intended to implement the General Plan by integrating a mix of uses including medical offices, commercial retail businesses and restaurants, residences, an assisted living project and other ancillary uses.

Prior to consideration of the future Master Plan (tentatively scheduled for Council action on May 3, 2007) and the intended mix of uses, it is necessary to

provide consistency between the applicable zoning and land use designation. The Mixed-Use and Commercial development regulations would apply to the Master Plan area. The maximum residential density permitted in the Mixed-Use component of the project is 20 dwelling units per acre. As part of the collaborative process in developing the Master Plan, the City has initiated this code amendment. The current building nearing completion of construction, and the other two development plans previously approved by the Planning Commission on the corner of 4th and Spring Streets are consistent with the commercial zoning of those properties. No other significant issues were identified by staff regarding this proposed amendment.

Impact: No fiscal impacts have been identified with this request.

Options: After opening the public hearing and taking public testimony, the City Council is requested to take one of the actions listed below:

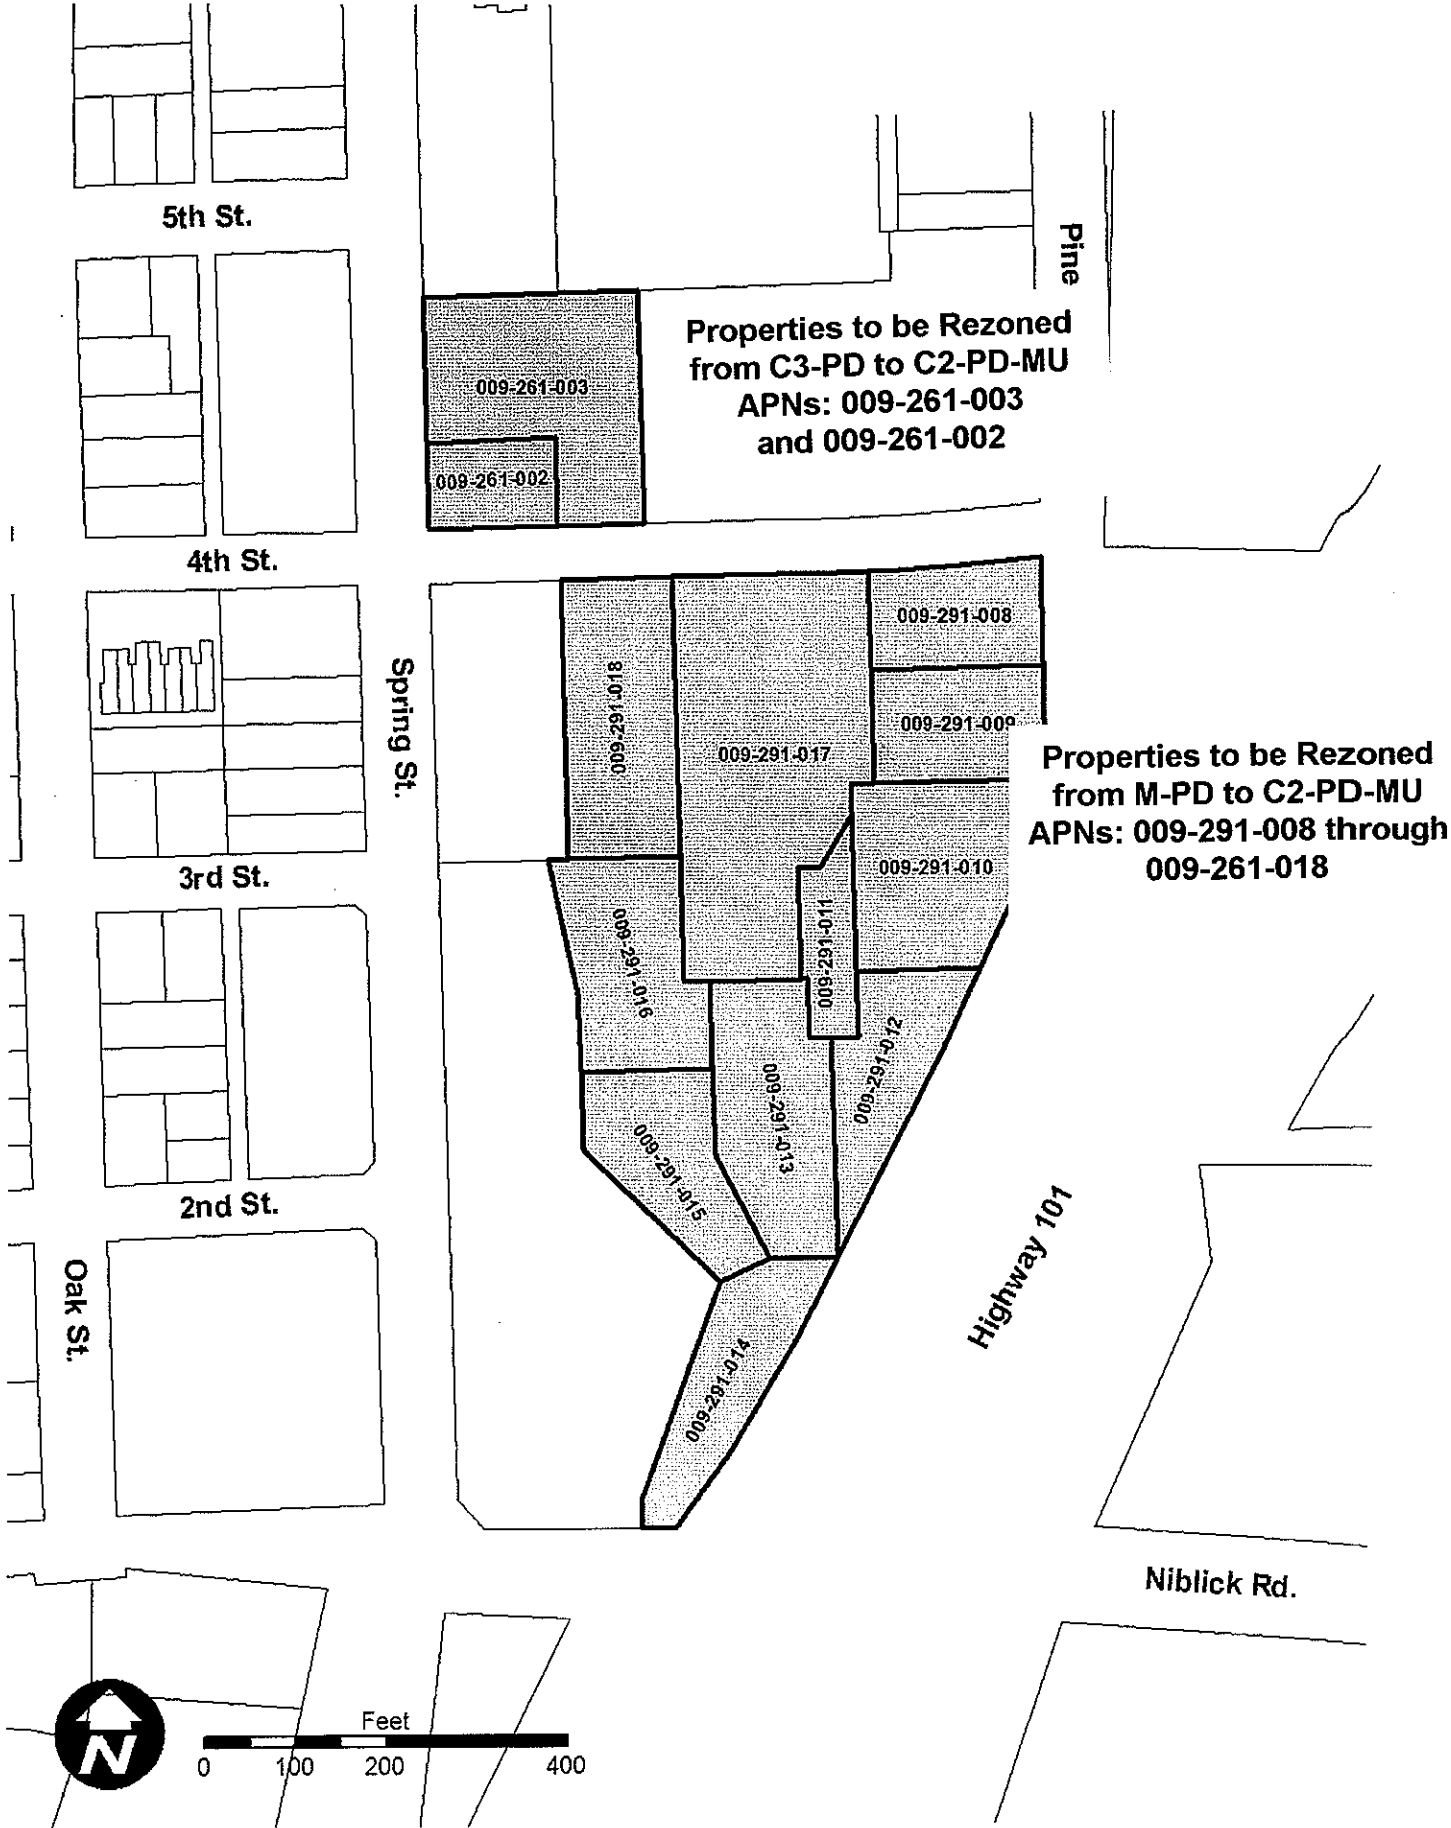

- a. By separate motions: 1) Approve the Resolution to adopt the Negative Declaration; and 2) Introduce for first reading Ordinance XXX N.S. approving Rezone 07-001.

4. EARLIER ENVIRONMENTAL ANALYSIS AND RELATED ENVIRONMENTAL DOCUMENTATION:

This Initial Study incorporates by reference the City of El Paso de Robles General Plan Environmental Impact Report (EIR) (SCH#2003011123).

5. CONTEXT OF ENVIRONMENTAL ANALYSIS FOR THE PROJECT:

This Initial Study relies on expert opinion supported by the facts, technical studies, and technical appendices of the City of El Paso de Robles General Plan EIR. These documents are incorporated herein by reference. They provide substantial evidence to document the basis upon which the City has arrived at its environmental determination regarding various resources.

6. PURPOSES OF AN INITIAL STUDY

The purposes of an Initial Study for a Development Project Application are:

- A. To provide the City with sufficient information and analysis to use as the basis for deciding whether to prepare an Environmental Impact Report, a Mitigated Negative Declaration, or a Negative Declaration for a site specific development project proposal;
 - B. To enable the Applicant of a site specific development project proposal or the City as the lead agency to modify a project, mitigating adverse impacts before an Environmental Impact Report is required to be prepared, thereby enabling the proposed Project to qualify for issuance of a Negative Declaration or a Mitigated Negative Declaration;
 - C. To facilitate environmental assessment early in the design of a project;
 - D. To eliminate unnecessary EIRs;
 - E. To explain the reasons for determining that potentially significant effects would not be significant;
 - F. To determine if a previously prepared EIR could be used for the project;
 - G. To assist in the preparation of an Environmental Impact Report if one is required; and
 - H. To provide documentation of the factual basis for the finding of no significant effect as set forth in a Negative Declaration or a Mitigated Negative Declaration prepared for the a project.
- ## **7. EXPLANATION OF ANSWERS FOUND ON THE ENVIRONMENTAL CHECKLIST FORM**

A. Scope of Environmental Review

This Initial Study evaluates potential impacts identified in the following checklist.

B. Evaluation of Environmental Impacts

1. A brief explanation is required for all answers to the questions presented on the following Environmental Checklist Form, except where the answer is that the proposed project will have "No Impact." The "No Impact" answers are to be adequately supported by the information sources cited in the parentheses following each question or as otherwise explained in the introductory remarks. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to the project. A "No Impact" answer should be explained where it is based on project-specific factors and/or general standards. The basis for the "No Impact" answers on the following Environmental Checklist Form is explained in further detail in this Initial Study in Section 9 (Earlier Environmental Analysis and Related Environmental Documentation) and Section 10 (Context of Environmental Analysis for the Project).

2. All answers on the following Environmental Checklist Form must take into account the whole action involved with the project, including implementation. Answers should address off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
3. "Potentially Significant Impact" is appropriate, if an effect is significant or potentially significant, or if the lead agency lacks information to make a finding of insignificance. If there are one or more "Potentially Significant Impact" entries when the determination is made, preparation of an Environmental Impact Report is warranted.
4. "Potentially Significant Impact Unless Mitigated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level. Mitigation Measures from Section 9 (Earlier Environmental Analysis and Related Environmental Documentation) may be cross-referenced).
5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). See Section 4 (Earlier Environmental Analysis and Related Environmental Documentation) and Section 11 (Earlier Analysis and Background Materials) of this Initial Study.
6. References to the information sources for potential impacts (e.g., general plans, zoning ordinances) have been incorporated into the Environmental Checklist Form. See Section 11 (Earlier Analysis and Related Environmental Documentation). Other sources used or individuals contacted are cited where appropriate.
7. The following Environmental Checklist Form generally is the same as the one contained in Title 14, California Code of Regulations; with some modifications to reflect the City's needs and requirements.
8. Standard Conditions of Approval: The City imposes standard conditions of approval on Projects. These conditions are considered to be components of and/or modifications to the Project and some reduce or minimize environmental impacts to a level of insignificance. Because they are considered part of the Project, they have not been identified as mitigation measures. For the readers' information, the standard conditions identified in this Initial Study are available for review at the Community Development Department.
9. Certification Statement: The statements made in this Initial Study and those made in the documents referenced herein present the data and information that are required to satisfy the provisions of the California Environmental Quality Act (CEQA) – Statutes and Guidelines, as well as the City's Procedures for Implementing CEQA. Further, the facts, statements, information, and analysis presented are true and correct in accordance with standard business practices of qualified professionals with expertise in the development review process, including building, planning, and engineering.

8. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The proposed project may potentially affect the environmental factors checked below, and may involve at least one impact that is a "Potentially Significant Impact" or is "Potentially Significant Unless Mitigated," if so indicated on the following Environmental Checklist Form (Pages 8 to 15)

9. ENVIRONMENTAL DETERMINATION: On the basis of this initial evaluation: I find that:

The proposed project could not have a significant effect on the environment; and, therefore, a **NEGATIVE DECLARATION** will be prepared.

Although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. Therefore, a **MITIGATED NEGATIVE DECLARATION** will be prepared.

The proposed project may have a significant effect on the environment; and, therefore an **ENVIRONMENTAL IMPACT REPORT** is required.

The proposed project may have a significant effect(s) on the environment, but one or more effects (1) have been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) have been addressed by mitigation measures based on the earlier analysis as described on attached sheets, if the effect is a "potentially significant impact" or is "potentially significant unless mitigated."

Therefore, an **ENVIRONMENTAL IMPACT REPORT** is required, but it will analyze only the effect or effects that remain to be addressed.

10 Environmental Checklist Form

ISSUES (and Supporting Information Sources):	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------------	--	------------------------------------	-----------

I. LAND USE AND PLANNING. Would the Proposal:

- a) Conflict with general plan designation or zoning?
(Sources: 1 & 8)

Discussion: The proposed amendment would provide consistency between the General Plan land use designation and zoning district that applies to this property.

- b) Conflict with applicable environmental plans or policies adopted by agencies with jurisdiction over the project?
(Sources: 1 & 3)

Discussion: The proposed project complies with the EIR recently certified for the City General Plan Update, 2003.

- c) Be incompatible with existing land uses in the vicinity?
(Sources: 1 & 3)

Discussion: The rezone would be compatible with surrounding land uses which are commercial and residential.

- d) Affect agricultural resources or operations (e.g., impacts to soils or farmlands, or impacts from incompatible uses)?

Discussion: There are no agricultural land uses or resources on or near the project site, therefore, this rezone could not affect agricultural resources.

- e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?
(Sources: 1 & 3)

Discussion: The property is currently vacant. The project will not disrupt or divide the arrangement of land uses in the community.

II. POPULATION AND HOUSING. Would the proposal:

- a) Cumulatively exceed official regional or local population projections? (Sources: 1 & 3)

Discussion: This project and applicable density established in the General Plan are consistent with the General Plan build out capacity, and will not result in exceeding population projections.

- b) Induce substantial growth in an area either directly or indirectly (e.g., through projects in an undeveloped area or extension of major infrastructure)? (Sources: 1 & 3)

Discussion: This project will not induce substantial growth.

--	--------------------------------	--	------------------------------	-----------

- c) Displace existing housing, especially affordable housing? (Sources: 1, 3, & 5)

Discussion: This project will not displace existing housing since it is a vacant site.

III. GEOLOGIC PROBLEMS. Would the proposal result in or expose people to potential impacts involving:

- a) Fault rupture? (Sources: 1, 2, & 3)

Discussion: The potential for and mitigation of impacts that may result from fault rupture in the project area are identified and addressed in the General Plan EIR, pg. 4.5-8. There are two known fault zones on either side of this valley. The Rinconada Fault system runs on the west side of the valley. The San Andreas Fault is on the east side of the valley and runs through the community of Parkfield east of Paso Robles. The City of Paso Robles recognizes these geologic influences in the application of the Uniform Building Code to all new development within the City. Review of available information and examinations indicate that neither of these faults is active with respect to ground rupture in Paso Robles. Soils reports and structural engineering in accordance with local seismic influences would be applied in conjunction with any new development proposal. Based on standard conditions of approval, the potential for fault rupture and exposure of persons or property to seismic hazards is not considered significant. In addition, per requirements of the Alquist-Priolo Earthquake Fault Zones, only structures for human habitation need to be setback a minimum of 50 feet of a known active trace fault. The proposed structures are not intended for human habitation.

- b) Seismic ground shaking? (Sources: 1, 2, & 3)

Discussion: The City is located within an active earthquake area that could experience seismic ground shaking from the Rinconada and San Andreas Faults. The proposed structure will be constructed to current UBC codes. The General Plan EIR identified impacts resulting from ground shaking as less than significant and provided mitigation measures that will be incorporated into the design of this project including adequate structural design and not constructing over active or potentially active faults.

- c) Seismic ground failure, including liquefaction? (Sources: 1, 2 & 3)

Discussion: See a. & b.

- d) Seiche, tsunamis, or volcanic hazard? (Sources: 1, 2, & 3)

Discussion: There are no water or volcanic hazards that could affect this property, thus potential impacts are less than significant.

- e) Landslides or Mudflows? (Sources: 1, 2, & 3)

Discussion: There are no landslide or mudflow hazards that could affect this property, thus potential impacts are less than significant.
