TO: JAMES L. APP, CITY MANAGER

FROM: RON WHISENAND, COMMUNITY DEVELOPMENT DIRECTOR

SUBJECT: DETERMINATION OF HISTORIC OR ARCHITECTURAL

SIGNIFICANCE OF ONE STRUCTURE AND A REQUEST TO PROCESS A PENDING DEMOLITION PERMIT APPLICATION

(DEMOLITION 07-004)

DATE: OCTOBER 2, 2007

Needs: For the City Council to consider an application filed by Ty and Jennifer

Christensen to authorize a demolition permit for one residence located at 1921

Spring Street.

Facts: 1. The site is located 1921 Spring Street. See Vicinity Map, Attachment 1.

2. The structure is listed in the City Survey of Historic Resources. A copy of the City Historic Resources Survey and Inventory for these buildings is in Attachment 2.

3. Per Chapter 17.16 (Demolition of Buildings and Structures) of the Municipal Code, the City Council is being asked to make a determination as to whether the buildings are of historic or architectural significance, and to authorize a demolition permit. A copy of the referenced code section is provided in Attachment 3.

- 4. Consistent with the requirements of the California Environmental Quality Act (CEQA), an Historic Review Report was prepared to evaluate the historic significance of the structures. The Report indicates that the structure is not historically significant. The Report is included in the Initial Study prepared for this project. The required notice has been published regarding consideration of the Draft Negative Declaration of Environmental Impact. A copy of the Initial Study is provided in Attachment 4.
- 5. The Development Review Committee approved conceptual plans (Site Plan 07-013) to construct a professional office building with a residential apartment at this site on June 8, 2007.

Analysis and Conclusions:

The Council has the discretion to make a determination as to the historic significance of buildings prior to processing demolition permits. Although the building is mentioned in the City's Historic Resources Survey and Inventory, it is not on any local, State or National Register of historic structures. Additionally, as noted above a Historic Review Report was prepared for the building at this site. The Report analyzed and evaluated the

structures and the specific criteria used to determine if structures are eligible to be listed on either a local, State or National Register. The conclusions of the Report indicate that "after review of the four CEQA requirements for determining the structure's potential historicity, it is determined, that the building at 1921 Spring Street does not meet the thresholds identified either by the National Parks Service Criteria or by local criteria for any preservation action. If the owners wish to demolish said structure, its removal will not constitute a significant loss to the history of Paso Robles."

The Historic Review is attached to the Initial Study for this project which is Attachment 4 to this staff report. The City has not received any comments from the public in regard to this proposed demolition permit request.

As noted above, the DRC (unanimously) approved Site Plan 07-013 to allow construction of a professional office with a residential apartment at this site on June 8, 2007. The development project was also supported by the Planning Commission with their approval of shared parking between the office and the residence on July 24, 2007. Intensified development of this site would be consistent with the City's General Plan and Economic Strategy by supporting infill mixed-use development in the downtown.

Reference:

Paso Robles General Plan and EIR, Paso Robles Municipal Code, Zoning Ordinance, 2006 Economic Strategy.

Fiscal

Impact: No immediate direct fiscal impact.

Options:

After opening the public hearing and taking public testimony, the City Council is requested to approve one of the Options listed below:

- a. By separate actions:
 - 1) Approve Resolution No. 07-xx adopting a Negative Declaration; and
 - 2) Authorize the demolition permit application be processed
- b. Amend, modify, or reject the above Option "a".

Report prepared by: Darren Nash, Associate Planner

DESCRIPTION

- 7a. Architectural style: Bungalow
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This rectangular, Kelley-stone and stucco-on-frame house, with its composition shingled roof, has some interesting features. The south gable end has an external, stucco fireplace. Two low symmetrical triangular dormers emerge on the east side. A cross gable peak, at center of roof, also faces east. These gables have boxed cornices. The raised brick porch has a ceiled overhang with a centered, truncated gable pediment. Face is wide vertical slats, making a vent. Porch supports are large, tapering round wood columns. Front entry has dual, symmetrical doors with multi-paned glass and wooden screen doors. Windows are French style. Yard is open, shrubs up next to the house.

Chapter 17.16

DEMOLITION OF BUILDINGS AND STRUCTURES

Sections:

17.16.010	Purpose and intent.
17.16.020	Permit required.
17.16.030	Application for permit.
17.16.040	Determination of historic or
	architectural significance.
17.16.050	Processing procedures.
17.16.060	Exception.

17.16.010 Purpose and intent.

The purpose of this chapter is to protect buildings, structures, and features which reflect special elements of the city's heritage and to seek alternatives to demolition for important historical resources. The protection and preservation of cultural resources are required in the interest of the health, prosperity, social and cultural enrichment, and general welfare of the people. (Ord. 586 N.S. Exh. A (part), 1989)

17.16.020 Permit required.

No person shall demolish any building or structure until a permit has been issued by the building official in accordance with the provisions set forth in this chapter. (Ord. 586 N.S. Exh. A (part), 1989)

17.16.030 Application for permit.

An application for a permit to wreck, demolish, or raze a building or structure shall be submitted to the building official. An application shall state:

- A. The precise location of the building or structure to be demolished identifying the building or structure to be removed and distances to the neighboring buildings, property lines, streets or right of ways, and public utilities;
- B. The type of equipment to be used to demolish the building or structure;
- C. The length, width, height, and principal materials or construction of the building or structure;

- D. The length of time required to complete the proposed demolition work;
- E. The name and address of the owner(s) of the building or structure;
- F. Proof of permission from the owner(s) and other vested interests to do the proposed work;
 - G. Method(s) of proposed demolition; and
- H. Any other information deemed necessary by the building official. (Ord. 586 N.S. Exh. A (part), 1989)

17.16.040 Determination of historic or architectural significance.

Upon receipt of an application for a permit to demolish a building or structure, the building official shall forward the application to the planning division of the community development department. The city planner shall determine whether the building or structure is a potential historic or architectural resource, using the following criteria:

- A. Inclusion on any list of historic and cultural resources, including, but not limited to, the National Register of Historic Buildings, the state list of significant historic buildings, the 1981-1984 Historic Resources Survey conducted by the community development department or any other recognized source of historic and cultural resources for the City of El Paso de Robles; and
- B. An evaluation of the building or structure based upon the following criteria:
- 1. Whether the building or structure reflects special elements of the city's historical, archaeological, cultural, social, economic, aesthetic, engineering, or architectural development; or
- 2. Whether the building or structure is identified with persons or events significant in local, state, or national history; or
- 3. Whether the building or structure embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship; or whether the building or structure represents an established and familiar visual feature of a neighborhood or community of the city.

Attachment 3

Chapter 17.16 Demo 07-004 (Christensen) The city planner shall make his/her determination within thirty days from the date the application for demolition is submitted. (Ord. 586 N.S. Exh. A (part), 1989)

17.16.050 Processing procedures.

- A. Nonsignificant Buildings or Structures. If the building or structure to be demolished is determined by the city planner as having no historic, architectural or aesthetic significance to the city, the city planner shall refer the matter back to the building official with recommendation to issue the demolition permit. When in doubt, the city planner may seek the review and advice from the architectural review committee/historic preservation commission. The demolition permit shall be effective on the date of issue.
 - B. Significant Buildings or Structures.
- (1) If the building or structure proposed to be demolished is determined by the city planner to have historic, architectural, or aesthetic significance to the city, the city planner shall schedule the request for demolition to the council for final determination at the next available hearing.
- (2) The community development department shall place a legal notice in a newspaper of general circulation in the city, announcing the proposed demolition. The notice shall be given in a manner consistent with city policies and procedures and state law. The notice shall show the location of the building or structure on a vicinity map with the street address. The community development department shall also notify by first class mail all property owners within a three-hundred-foot radius of the proposed demolition and any persons or organizations that have asked to be notified of the application for demolition permits. The applicant for the demolition permit shall be responsible for providing a set of mailing labels containing the property owners and addresses based upon the latest county assessor's tax roll.
 - C. Findings Required.
- (1) The council may, upon finding that the building or structure is of significant historical character, require a six month continuance in consideration of

the demolition permit request with an option to extend the continuance for an additional six month period should that become necessary. The purpose of the continuance, and the possible extension, is to provide adequate time to investigate alternatives to demolition.

- (2) Upon making the determination that there are no feasible alternatives to demolition, the council may direct the building official to issue the permit.
- (3) The demolition of all buildings and structures shall be conducted in accordance with all conditions outlined in Chapter 44 and subsection 4409 of the Uniform Building Code as adopted by council. (Ord. 586 N.S. Exh. A (part), 1989)

17.16.060 Exception.

Upon determination by the building official that the building or structure to be demolished poses a threat to the health and safety of persons in the area surrounding the subject structure, the building official may, with the community development director's concurrence, issue the demolition permit without city council review and the findings set forth in this chapter. The building official may also require fencing or other appropriate measures to secure the site pending review by staff and/or council. (Ord. 586 N.S. Exh. A (part), 1989)

356-9 (El Paso de Robles 9-99)

RESOLUTION NO. 07-XXX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PASO ROBLES FOR DEMOLITION APPLICATION 07-004 ADOPTING A NEGATIVE DECLARATION AND DIRECTING DEMOLITION OF STRUCTURE AT 1921 SPRING STREET APNs 008-233-010, APPLICANT – TY & JENNIFER CHRISTENSEN

WHEREAS, pursuant to Chapter 17.16 (Demolition of Buildings and Structures) of the Municipal Code, the City Council is being asked to make a determination as to whether the subject building located at 1921 Spring Street, is of historic or architectural significance, and to authorize a demolition permit; and

WHEREAS, Demolition 07-004 is a proposal to demolish 1 single family residence; and

WHEREAS, consistent with the requirements of the California Environmental Quality Act (CEQA), an Initial Study has been prepared and the required notice has been published regarding consideration of a Negative Declaration of Environmental Impact; and

WHEREAS, Public Notice of the proposed Negative Declaration and demolition request was given as required by Section 21092 of the Public Resources Code and Section 17.16.050 B(2) of the Paso Robles City Municipal Code; and

WHEREAS, the City Council has the discretion to make a final determination as to the subject buildings historic or architectural significance or non-significance prior to the processing of the demolition permit; and

WHEREAS, although the subject buildings are in the City's Historic Resources Survey and Inventory, they are not on any local, State or National Register of historic structures; and

WHEREAS, although not specifically listed, state law will still require analysis and a determination of historic significance prior to City Council authorizing demolition; and

WHEREAS, based on information contained in a Historic Review dated August 2007 and the Initial Study prepared as provided in Exhibit A, for this project and testimony received as a result of public notice, the City Council finds that the building is not historically or architecturally significant and there would not be a significant impact on the environment if the application was approved.

THEREFORE BE IT HEREBY RESOLVED that based on the City Council of the City of El Paso de Robles, independent judgment, the City Council does hereby approve a Negative Declaration in conjunction with determining that the subject building is not of architectural or historic significance and direct the Building Official to issue a demolition permit for the structure, in accordance with Section 17.16.050 B (2) of the Paso Robles City Municipal Code.

CITY OF PASO ROBLES – PLANNING DIVISION INITIAL STUDY

1. GENERAL PROJECT INFORMATION

PROJECT TITLE: Ostrander Demolition – Demo 07-004

LEAD AGENCY: City of Paso Robles - 1000 Spring Street, Paso Robles, CA 93446

Contact: Darren Nash, Associate Planner

Telephone: (805) 237-3970

PROJECT LOCATION: 1921 Spring Street (APN 008-233-010)

PROJECT PROPONENT: Applicant: Ty & Jennifer Christensen

5655 Encino Avenue, Atascadero, CA 93422

LEAD AGENCY CONTACT/

INITIAL STUDY PREPARED BY: Darren Nash, Associate Planner

 Telephone:
 (805) 237-3970

 Facsimile:
 (805) 237-3904

 E-Mail:
 dnash@preity.com

GENERAL PLAN DESIGNATION: Office Professional / Mixed Use Overlay (OP/M-U)

ZONING: Office Professional (OP)

2. PROJECT DESCRIPTION

The proposed project is a request to demolish one older single family residential house that currently existing on property located at 1921 Spring Street. The request is based on the applicants desire to move forward with the construction of a new office professional building with a residential apartment project approved by the Development Review Committee (DRC).

The approximate 1,300 square foot single family residence is included in the City's Historic Building Inventory. Although the building is in the inventory, the inventory does not provide an architectural historic analysis of structures and therefore does not indicate if structures are historically significant. Therefore, an historic analysis was prepared by a qualified architectural historian to evaluate the historic significance of the existing structures on the properties.

The historic analysis evaluated the structures relative to the criteria established by the Secretary of Interior Standards and Guidelines for placing structures on the National Register of Historic Places (NRHP) and the California Register of Historic Resources (CRHR), and the California Environmental Quality Act.

Attachment 5
Environmental Initial Study
Demo 07-004
(Christensen)

To qualify as an historic structure a building must meet one of the following criteria and maintain enough visual integrity to support the criteria under which it qualifies. The criteria are identified by the California Public Resources Code, Section 5024.1 Title 14 covering the eligibility of a property to determine if it

- 1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage (may be of national, state or local interest).
- 2. It is associated with the lives of persons important in our past.
- 3. Embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of an important creative individual, or possesses high aesthetic value.
- 4. Has yielded, or may be likely to yield, information important in prehistory or history.

The conclusions of the Report indicates that "after review of the four CEQA requirements for determining the structure's potential historicity, it is determined, that the building at 1921 Spring Street does not meet the thresholds identified either by the National Parks Service Criteria or by local criteria for any preservation action. If the owners wish to demolish said structure, its removal will not constitute a significant loss to the history of Paso Robles." See Historic Review Report attached as Attachment A.

3. OTHER AGENCIES WHOSE APPROVAL MAY BE REQUIRED (For example, issuance of permits, financing approval, or participation agreement):

None.

4. EARLIER ENVIRONMENTAL ANALYSIS AND RELATED ENVIRONMENTAL DOCUMENTATION:

This Initial Study incorporates by reference the City of El Paso de Robles General Plan Environmental Impact Report (EIR) (SCH#2003011123).

5. CONTEXT OF ENVIRONMENTAL ANALYSIS FOR THE PROJECT:

This Initial Study relies on expert opinion supported by the facts, technical studies, and technical appendices of the City of El Paso de Robles General Plan EIR. These documents are incorporated herein by reference. They provide substantial evidence to document the basis upon which the City has arrived at its environmental determination regarding various resources.

6. PURPOSES OF AN INITIAL STUDY

The purposes of an Initial Study for a Development Project Application are:

- A. To provide the City with sufficient information and analysis to use as the basis for deciding whether to prepare an Environmental Impact Report, a Mitigated Negative Declaration, or a Negative Declaration for a site specific development project proposal;
- B. To enable the Applicant of a site specific development project proposal or the City as the lead agency to modify a project, mitigating adverse impacts before an Environmental Impact Report is required to be prepared, thereby enabling the proposed Project to qualify for issuance of a Negative Declaration or a Mitigated Negative Declaration;
- C. To facilitate environmental assessment early in the design of a project;

 Initial Study-Page 2

- D. To eliminate unnecessary EIRs;
- E. To explain the reasons for determining that potentially significant effects would not be significant;
- F. To determine if a previously prepared EIR could be used for the project;
- G. To assist in the preparation of an Environmental Impact Report if one is required; and
- H. To provide documentation of the factual basis for the finding of no significant effect as set forth in a Negative Declaration or a Mitigated Negative Declaration prepared for the a project.

7. EXPLANATION OF ANSWERS FOUND ON THE ENVIRONMENTAL CHECKLIST FORM

A. Scope of Environmental Review

This Initial Study evaluates potential impacts identified in the following checklist.

B. Evaluation of Environmental Impacts

- 1. A brief explanation is required for all answers to the questions presented on the following Environmental Checklist Form, except where the answer is that the proposed project will have "No Impact." The "No Impact" answers are to be adequately supported by the information sources cited in the parentheses following each question or as otherwise explained in the introductory remarks. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to the project. A "No Impact" answer should be explained where it is based on project-specific factors and/or general standards. The basis for the "No Impact" answers on the following Environmental Checklist Form is explained in further detail in this Initial Study in Section 9 (Earlier Environmental Analysis and Related Environmental Documentation) and Section 10 (Context of Environmental Analysis for the Project).
- 2. All answers on the following Environmental Checklist Form must take into account the whole action involved with the project, including implementation. Answers should address off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. "Potentially Significant Impact" is appropriate, if an effect is significant or potentially significant, or if the lead agency lacks information to make a finding of insignificance. If there are one or more "Potentially Significant Impact" entries when the determination is made, preparation of an Environmental Impact Report is warranted.
- 4. Potentially Significant Impact Unless Mitigated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level. Mitigation Measures from Section 9 (Earlier Environmental Analysis and Related Environmental Documentation) may be cross-referenced).
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). See Section 4 (Earlier Environmental Analysis and Related Environmental Documentation) and Section 11 (Earlier Analysis and Background Materials) of this Initial Study.

- 6. References to the information sources for potential impacts (e.g., general plans, zoning ordinances) have been incorporated into the Environmental Checklist Form. See Section 11 (Earlier Analysis and Related Environmental Documentation). Other sources used or individuals contacted are cited where appropriate.
- 7. The following Environmental Checklist Form generally is the same as the one contained in Title 14, California Code of Regulations; with some modifications to reflect the City's needs and requirements.
- 8. Standard Conditions of Approval: The City imposes standard conditions of approval on Projects. These conditions are considered to be components of and/or modifications to the Project and some reduce or minimize environmental impacts to a level of insignificance. Because they are considered part of the Project, they have not been identified as mitigation measures. For the readers' information, the standard conditions identified in this Initial Study are available for review at the Community Development Department.
- 9. Certification Statement: The statements made in this Initial Study and those made in the documents referenced herein present the data and information that are required to satisfy the provisions of the California Environmental Quality Act (CEQA) Statutes and Guidelines, as well as the City's Procedures for Implementing CEQA. Further, the facts, statements, information, and analysis presented are true and correct in accordance with standard business practices of qualified professionals with expertise in the development review process, including building, planning, and engineering.

8. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

		y Significant Impact" or is "Poten onmental Checklist Form (Pages 8 t		gated," if so				
	☐ Land Use & Planning	☐ Transportation/Circulation	☐ Public Services					
	☐ Population & Housing	☐ Biological Resources	☐ Utilities & Service S	ystems				
	☐ Geological Problems	☐ Energy & Mineral Resources	☐ Aesthetics					
	☐ Water	□ Hazards	☐ Cultural Resources					
	☐ Air Quality	□ Noise	☐ Recreation					
		☐ Mandatory Findings of Signit	ficance					
).	ENVIRONMENTAL DETERM	IINATION: On the basis of this in	nitial evaluation: I find that:					
	The proposed project could not have a significant effect on the environment; and, therefore, a NEGATIVE DECLARATION will be prepared.							
	Although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described on an attached sheet have been added to the project. Therefore, a MITIGATED NEGATIVE DECLARATION will be prepared.							
	The proposed project may have a significant effect on the environment; and, therefore an ENVIRONMENTAL IMPACT REPORT is required.							
	The proposed project may have a significant effect(s) on the environment, but one or more effects (1) have been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) have been addressed by mitigation measures based on the earlier analysis as described on attached sheets, if the effect is a "potentially significant impact" or is "potentially significant unless mitigated."							
	Therefore, an ENVIRONMEN only the effect or effects that rer	TAL IMPACT REPORT is requirement to be addressed.	red, but it will analyze					
	Signature:	Date:						
	Jan 1/L	September 12	, 2007

RE: Historic Review
1921 Spring Street
Paso Robles, CA 93446

The applicant is requesting to demolish and replace the small house located at the above address (parcel # 9-142-01). This unit is identified in the City Historic Resources Inventory (6/30/1984) as built in 1924. It therefore meets the 50 year test that requires further analysis before action is taken which might destroy the structure's historicity (if any). Its potential historic/architectural importance according to the historic inventory is that it is "An unusual style of bungalow. This house has endured the zoning changes occurring around it and still retained its style, adding to the harmony of the street." Since the unit has been identified on the historic inventory, the City has requested additional review to determine if the proposed action will be consistent with City ordinances and California Environmental Quality Act (CEQA) requirements.

Evaluation of Criteria

To qualify as an historic structure a building must meet one of the following criteria <u>and</u> maintain enough visual integrity to support the criteria under which it qualifies. The criteria are identified by California Public Resources Code, Section 5024.1 Title 14 covering the eligibility of a property to determine if it

- Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage (may be of national, state or local interest).
- 2. Is associated with the lives of persons important in our past.
- 3. Embodies the distinctive characteristics of a type, period, region or method of construction, or represents the work of an important creative individual, or possesses high artistic value.
- Has yielded, or may be likely to yield, information important in prehistory or history.

Description of Residential Unit and City Context:

The unit is a single story, approximately 1300 square foot residential unit. The surrounding area along Spring Street includes both traditional and contemporary architectural styles. On the west side of Spring Street, almost all the residential

Attachment A
Historic Review

10/03/67 Agenda Item No. 1 - Page 28 of 38
(Christensen)

structures are currently used for commercial purposes and have maintained many of their original features well throughout the years. The lots are similar in size, with the exception of the house on the southern corner.

On the east side of Spring Street, the structures vary in architectural style and character, and are also used for commercial purposes. The styles range from simple Mediterranean, to Craftsman, to contemporary. The street section also narrows as one head south, about half-way down the 1900 block of Spring Street. The structure at 1921 Spring Street is generally of a craftsman architectural style and is adjacent to an older single family residence the south and a small house now converted to a business on the north. The general features of the units are shown in the photographs of Figures 1 and 2. The 1984 Historic Inventory is included here as Attachment A.

Evaluation of Structure's Historicity

The scope of this report was to evaluate the structure based upon existing published information such as the *Historic Buildings within the City of Paso Robles* (1993) and the 'Self-Guided Walking Tour of Historic Buildings – El Paso de Robles', (2006). Further a discussion was held with Norma Moye (Director of Paso Robles Main Street and a recognized person with a multiple generational knowledge of Paso Robles history) to determine if she was aware of any oral or non recorded history that was not contained in the above mentioned documents. Additional research was conducted at the Cal Poly reference library which contains historic directories of residential occupancy for the years spanning 1950 through 1959. This analysis did not include a chain of title documentation.

Review of these historic resources confirms that the only reasonably applicable criteria would be the first wherein the structure might be associated with the pattern of local community development along north Spring Street in the 1920s-30s. There is no record of this structure being associated with persons of importance in our past, nor does it embody the distinctive characteristics of a type, period, or region or method of construction that would make it meet the relatively high standards of criteria #3 (See interpretative guidelines by National Park Service Bulletin #15.) Finally, it has not yielded nor is it likely to yield information important in prehistory or history.

The focal issue then, becomes whether the structure qualifies as being part of the local pattern of history with significance to understanding the development of Paso Robles as a community? The structure, while retaining many of its architectural characteristics (roof forms and some front entry detailing as well as window treatment), is not listed in any of the above documents as being worthy of consideration in terms of its specific architectural character or as being a specific and unique example of the craftsman style of architecture. While the structure is consistent with the surrounding neighborhood in architectural features and size, there are no historic documents approved by the City of Paso Robles which set forth any City preservation criteria nor that identify this northern portion of Spring Street as being an historic district with relevance to the City's local pattern of development.

In conclusion this structure does not meet any of the identified CEQA historic criteria for historic eligibility.

Evaluation of Property's Integrity

While the structure does not meet the basic threshold criteria for any further preservation action, it may be helpful to provide a brief comment on the structure's architectural integrity even thought it is not required.

The integrity criteria were developed to assist in determining whether a knowledgeable person could sense the history of a structure as one approached it. Thus if a structure has historical merit but does not retain enough integrity to link it with the events that are associated with it, it does not merit a further response under CEQA. These criteria, however, must be applied within the context in which the structure gained its historic character and its ability to convey its historicity.

In this instance, and in some cases since 1984 when the referenced historic resources survey was made, there have been changes to the 1924 structure.

- 1. The front multi-paned glass and wooden screen doors of the unit have been replaced with solid face, newer wood doors very out of character with the craftsman concepts of design.
- 2. The two low, symmetrical triangular dormers on the east (front) side of the house have been removed.
- 3. The porch is no longer brick, but has been replaced with concrete.
- 4. The lower portions of the house have been resided with scored plywood.

These changes can be seen in the photos of Figure 1 and 2.

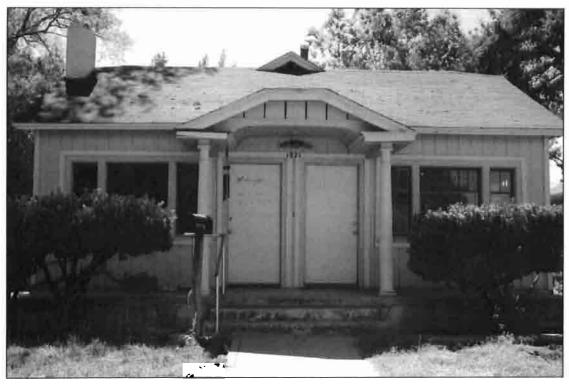

In conclusion, to the typical knowledgeable viewer, while this unit is visually typical of a small pre-World War II bungalow, only the general roof forms, entry columns and cornice returns and the window forms and shingles at the upper gables remain of the original design remain. This structure would not have enough architectural integrity to support further preservation.

Conclusions

After review of the four CEQA requirements for determining the structure's potential historicity, it is determined, that the building at 1921 Spring Street does not meet the thresholds identified either by the National Park Service Criteria or by local criteria for any preservation action. If the owner wishes to demolish said structure, its removal will not constitute a significant loss to the history of Paso Robles.

Preparer's Qualifications

Research for this report was conducted by or under the supervision of Andrew Merriam, recognized as an historic architect by the City of Paso Robles. Mr. Merriam is a consulting planner with the Wallace Group and has been conducting historic studies in the Central Coast Area since 1987. Previous historic evaluations include the Harford Pier (Port San Luis Harbor District), the Avila School House, Grocery Store and San Luis Yacht Club, as well as the Loomis Building and Masonic Lodge in Arroyo Grande. Mr. Merriam served as Chairman of the City of San Luis Obispo's Cultural Heritage Committee when the historic districts and preservation criteria were adopted. He is also the architect of record in the restoration of the Point San Luis Lightstation.

DESCRIPTION

- 7a. Architectural style: Bungalow
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This rectangular, Kelley-stone and stucco-on-frame house, with its composition shingled roof, has some interesting features. The south gable end has an external, stucco fireplace. Two low symmetrical triangular dormers emerge on the east side. A cross gable peak, at center of roof, also faces east. These gables have boxed cornices. The raised brick porch has a ceiled overhang with a centered, truncated gable pediment. Face is wide vertical slats, making a vent. Porch supports are large, tapering round wood columns. Front entry has dual, symmetrical doors with multi-paned glass and wooden screen doors. Windows are French style. Yard is open, shrubs up next to the house.

CITY OF EL PASO DE ROBLES

NOTICE OF PUBLIC HEARING

NOTICE OF INTENT TO ADOPT A NEGATIVE DECLARATION

NOTICE IS HEREBY GIVEN that the City Council of the City of El Paso de Robles will hold a Public Hearing to consider adoption of a Negative Declaration (statement that there will be no significant environmental effects) in accordance with the provisions of the California Environmental Quality Act (CEQA), and approval of a demolition permit for the following project: ing project:

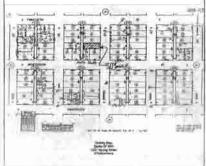

Demolition 07-004: a request by Ty and Jennifer Christensen, to demolish the existing house on the site located at 1921 Spring Street (Parcel No. 008-233-010).

The public review period for the Draft Negative Declaration commences on September 12, 2007 and ends at the Public Hearing, which is scheduled to take place on Tuesday, October 2, 2007 at the hour of 7:30 pm in the Conference Center (First Floor) at the Paso Robles Library/City Hall, 1000 Spring Street, Paso Robles, California. All interested parties may appear and be heard at this hearing.

Copies of the staff report to the City Council will be available for review in the City Library and City hall on the Friday before the City Council meeting. Photocopies of the staff report may be purchased for the cost of reproduction.

Written comments on the proposed demolition may be mailed to the Community Development Department, 1000 Spring Street, Paso Robles, CA 93446 provided that such comments are received prior to the time of the public hearing. Oral comments may be made at the hearing. Should you have any questions regarding this application, please call Darren Nash at (805) 237-3970.

If you challenge the demolition application in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in writ-ten correspondence delivered to the City Council at, or prior to, the public hearing.

Darren Nash, Associate Planner
