R. Lata, Community Development Director

Consider making a determination as to the historic or architectural significance of a building at 739-745 12th Street that was severely damaged in the December 22, 2003, San Simeon earthquake. (Council has the discretion to make a final determination as the subject building's historic or architectural significance prior to the processing of a demolition permit.)

Councilmember Nemeth, seconded by Councilmember Finigan, moved to determine (1) that the building in its present condition is no longer a historic resource and is therefore not subject to Section 15064.5 of the Guidelines for implementing the California Environmental Quality Act (CEQA), and that a Categorical Exemption under Section 15301(l)(3) would apply; and (2) that the existing building is also not a historic resource by virtue of not being eligible for inclusion in the National Register; and (3) that the subject building presents an imminent threat to the public of bodily harm and damage to adjacent property (in the context of State Resources Code Section 5028). Based on the foregoing, direct that the demolition permit application be processed. Any replacement structure will be the subject of a future Planned Development application and would be subject to whatever public policy requirements as may apply at the time of a request for a project approval.

Based on the foregoing, direct that the demolition permit application be processed based on the property owner's intent to provide a replacement structure containing new hotel rooms that will be consistent with or complementary to the balance of the Paso Robles Inn and also the City's ability to require an appropriate architectural treatment through the Planned Development process.

R. Lata, Community Development Director

Consider continuing a public hearing to establish vehicle weight limits on residential streets. Further action was deferred pending a court decision that could impact the City's ability to enforce vehicle weight restrictions. J. Deakin, Public Works Director

Consider final budget for the 13th Street Bridge Widening Project. (In early 1999, Council approved a contract with URS Corporation, a transportation engineering firm, to begin design of the bridge widening and adjacent streets. The approved design concept calls for widening the bridge to accommodate four travel lanes [two in each direction], two turn lanes, two bike lanes, and sidewalks on both sides. Beyond the bridge limits, adjacent streets [North and South River Roads, Creston Road and Union Road] will also be widened to maximize flow at the intersection and relieve traffic congestion. 25. Atascadero Automatic Aid Agreement

Consider an automatic aid agreement with the City of Atascadero. (Automatic aid provides for the immediate dispatching of resources for emergencies where their use can be reasonably anticipated. This agreement would provide a faster response of Paso Robles ladder truck for fires in commercial and multi-family buildings in Atascadero, and Paso Robles would receive an expedited dispatch of an Atascadero fire engine for commercial or multi-family buildings and wildland fires.)
