11. A Planning Impact Area is established to indicate the maximum potential geographical boundaries to which the City may grow in the foreseeable future, or areas within which development patterns would impact upon the City. The establishment of the Planning Impact Area does not represent a commitment by the City to annex or to provide urban services to the subject areas.

The Planning Impact Area is shown on the map on page 9b.

An Urban Reserve Line (URL) and a Sphere of Influence (SOI) are established to indicate the geographical boundaries to which the City may grow and consider annexations. The establishment of the URL and SOI lines do not represent a commitment by the City to annex or to pre-assign Land Use Categories outside of City Limits.

A Sphere of Service (SOS) is established to indicate those areas within the SOI that the City has indicated that it intends to provide services, particularly sewer and water, on a first-come, first-served basis following annexation.

The URL, SOI, and SOS lines are shown on the map on page 9c.

Upon the establishment of these lines and with any future amendment of the URL, SOI, and SOS lines, the City will request the following:

- o That the County amend its Land Use Element so that its Urban Reserve Line coincides with the City's URL;
- o That the County's Local Agency Formation Commission (LAFCO) amend its Sphere of Influence and Service Lines to coincide with the City's SOI and SOS Lines.
- o That the County require all development within the URL to occur to City Standards, with the expectation that land within this boundary will ultimately be annexed by the City.
