

RESOLUTION NO.: 06-0077

A RESOLUTION OF THE PLANNING COMMISSION
OF THE CITY OF EL PASO DE ROBLES
TO GRANT TENTATIVE MAP APPROVAL FOR
TRACT 2839
(JRW GROUP, INC.)

APN: 025-421-039

WHEREAS, Tract 2839 has been filed by Geo-West Land Consultants on behalf of JRW Group, Inc. to construct subdivide a 2.6 acre site into 8 lots for the construction of 8 light industrial / manufacturing buildings; and

WHEREAS, the site is located on Lot 12 of Tract 2269, the northwest corner of Wistera Lane and Germaine Way; and

WHEREAS, the General Plan land use designation is Planned Industrial (PM), the Zoning is BP, Business Park; and

WHEREAS, in conjunction with Tract 2839, Planned Development 06-010 has been submitted to for the approval of the architectural and site planning components of the project; and

WHEREAS, an Initial Study was prepared for this project in accordance with the California Environmental Quality Act (CEQA) and a Mitigated Negative Declaration was approved by the Planning Commission on September 26, 2006, and

WHEREAS, a public hearing was conducted by the Planning Commission on September 26, 2006 to consider facts as presented in the staff report prepared for the tentative tract map, and to accept public testimony regarding the application, and

WHEREAS, based upon the facts and analysis presented in the staff report, public testimony received and subject to the conditions listed below, the Planning Commission makes the following findings as required by Government Code Sections 66474 and 65457:

1. The proposed tentative parcel map is consistent with the adopted General Plan for the City of El Paso de Robles, by providing the opportunity for clean attractive business to be located in the Business Park/Planned Industrial designated areas of the City;
2. The proposed development plan and subdivision of the 2.6-acre site into smaller lots would meet the intent of the Economic Strategy by giving the smaller business owners the opportunity to own their own building and would therefore, promote local industry, products and services;
3. The design of lots, streets, open space, drainage, sewers, water and other improvements is consistent with the General Plan and Zoning Ordinance;

4. The site is physically suitable for the type of development proposed;
5. The site is physically suitable for the proposed density of development;
6. The design of the land division is not likely to cause substantial environmental damage or substantially and unavoidably injure fish or wildlife or their habitat;
7. The design of the land division and types of improvements proposed are not likely to cause serious public health problems;
8. The design of the land division and the type of improvements proposed will not conflict with easements acquired by the public at large, for access through or use of, property within the proposed subdivision;

NOW, THEREFORE, BE IT RESOLVED, that the Planning Commission of the City of El Paso de Robles, does hereby grant tentative map approval for Tentative Tract 2839 subject to the following conditions of approval:

STANDARD CONDITIONS OF APPROVAL:

1. The applicant/developer shall comply with those standard conditions which are indicated as applicable in "Exhibit A" to this resolution.
2. The project shall comply with all conditions of approval in the resolution granting approval to Planned Development 06-010 and its exhibits. In the event that either the tract or development plan is not approved, the approval of one plan does not automatically grant approval of the other.

SITE SPECIFIC CONDITIONS OF APPROVAL:

NOTE: In the event of conflict or duplication between standard and site specific conditions, the site specific condition shall supersede the standard condition.

COMMUNITY DEVELOPMENT SITE SPECIFIC CONDITIONS:

NOTE: In the event of conflict or duplication between standard and site specific conditions, the site specific condition shall supersede the standard condition.

3. The project shall be constructed so as to substantially conform with the following listed exhibits and conditions established by this resolution:

<u>EXHIBIT</u>	<u>DESCRIPTION</u>
A	Standard Conditions
B	Vesting Tentative Tract Map
4. This Tentative Tract Map 2839 coincides with Planned Development 06-010 and authorizes the subdivision of a 8-lot light industrial/manufacturing subdivision on a 2.6 acre site.

5. The project has been designed to have 80 parking spaces which would comply with the 8 buildings (totaling 39,872 square feet) to be utilized for light-industrial/manufacturing uses (1 parking space per 500 square feet of building). With the recording of the final map, constructive notice shall be recorded against each parcel informing future property owners that the use of each building are limited to light-industrial/manufacturing uses based on the 80 parking spaces.
6. If that applicant wishes to provide additional parking spaces that would support commercial uses allowed in the PM Zoning district, the plan will need to be submitted prior to the recording of the tract map or prior to the issuance of a building permit for the first building. The revised parking plan will need to specifically call out the amount of square footage allowed for commercial uses. CC&Rs will also need to indicate parking/use parameters and the process for consistent management and enforcement among the 8 parcels by the Association. This information will need to be recorded against each parcel by Constructive Notice.
7. In conjunction with the recording of the final map, a constructive notice shall be recorded against each parcel indicating the Planning Commission's approval of PD 06-010 and the listed exhibits and conditions of approval establishing architectural and site planning requirements.
8. The Final Subdivision Map shall be in substantial compliance with the tentative subdivision map (Exhibits B reduction attached; full size copies are on file in the Community Development Department) and as amended by site specific and standard conditions contained in this resolution.
9. The project shall comply with all conditions of approval in the resolution granting approval to Planned Development 06-010 and its exhibits.
10. The project shall be in compliance the following recommendations of the San Luis Obispo County Air Pollution Control District so as to minimize creation of fugitive dust and other emission resulting from use of construction equipment as follows:

CONSTRUCTION PHASE MITIGATION:

Dust Control Measures

Construction activities can generate fugitive dust, which could be a nuisance to local residents and businesses in close proximity to the proposed construction site. Dust complaints could result in a violation of the District's 402 "Nuisance" Rule. Due to this project's proximity to neighboring commercial uses the APCD conditions this project to comply with all applicable air quality regulations pertaining to the control of fugitive dust (PM10) as contained in section 6.5 of the Air Quality Handbook. **All site grading and demolition plans noted shall list the following regulations:**

- a. Reduce the amount of the disturbed area where possible.
- b. Use of water trucks or sprinkler systems in sufficient quantities to prevent airborne dust from leaving the site. Increased watering frequency would be required whenever wind speeds exceed 15 mph. Reclaimed (nonpotable) water should be used whenever possible.
- c. All dirt stock pile areas should be sprayed daily as needed.

- d. Permanent dust control measures identified in the approved project revegetation and landscape plans should be implemented as soon as possible following completion of any soil disturbing activities.
- e. Exposed ground areas that are planned to be reworked at dates greater than one month after initial grading should be sown with a fast germinating native grass seed and watered until vegetation is established.
- f. All disturbed soil areas not subject to revegetation should be stabilized using approved chemical soil binders, jute netting, or other methods approved in advance by the APCD.
- g. All roadways, driveways, sidewalks, etc. to be paved should be completed as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used.
- h. Vehicle speed for all construction vehicles shall not exceed 15 mph on any unpaved surface at the construction site.
- i. All trucks hauling dirt, sand, soil, or other loose materials are to be covered or should maintain at least two feet of freeboard (minimum vertical distance between top of load and top of trailer) in accordance with CVC Section 23114.
- j. Install wheel washers where vehicles enter and exit unpaved roads onto streets, or wash off trucks and equipment leaving the site.
- k. Sweep streets at the end of each day if visible soil material is carried onto adjacent paved roads. Water sweepers with reclaimed water should be used where feasible.

All PM10 mitigation measures required should be shown on grading and building plans. In addition, the contractor or builder should designate a person or persons to monitor the dust control program and to order increased watering, as necessary, to prevent transport of dust offsite. Their duties shall include holidays and weekend periods when work may not be in progress. **The name and telephone number of such persons shall be provided to the APCD prior to land use clearance for map recordation and finished grading of the area.**

Naturally Occurring Asbestos

The project site is located in a candidate area for Naturally Occurring Asbestos (NOA), which has been identified as a toxic air contaminant by the California Air Resources Board (ARB). Under the ARB Air Toxics Control Measure (ATCM) for Construction, Grading, Quarrying, and Surface Mining Operations, **prior to any grading activities at the site, the project proponent shall ensure that a geologic evaluation is conducted to determine if NOA is present within the area that will be disturbed.** If NOA is not present, an exemption request must be filed with the District (see Attachment 1). If NOA is found at the site the applicant must comply with all requirements outlined in the Asbestos ATCM. This may include development of an Asbestos Dust Mitigation Plan and an Asbestos Health and Safety Program for approval by the APCD. Please refer to the APCD web page at <http://www.slocleanair.org/business/asbestos.asp> for more information or contact Karen Brooks of our Enforcement Division at 781-5912.

Permits

Based on the information provided, we are unsure of the types of equipment that may be present at the site. Portable equipment used during construction activities may require California statewide portable equipment registration (issued by the California Air Resources Board) or a District permit. Operational sources, such as back up generators, may also require APCD permits. **To minimize potential delays, prior to the start of the project, please contact David Dixon of the District's**

Engineering Division at (805) 781-5912 for specific information regarding permitting requirements.

OPERATIONAL PHASE MITIGATION:

The APCD staff considered the operational impact of this commercial development by running the URBEMIS 2002 computer model, a tool for estimating vehicle travel, fuel use and the resulting emissions related to this project's land uses. This indicated that operational phase impacts will likely be more than the APCD's CEQA Tier I significance threshold value of 10 lbs/day for nitrogen oxides (NOx), Reactive Organic Gases (ROG) and Particulate Matter (PM10).

11. Use and operation of the project and its appurtenances shall be conducted in compliance with the City's General Performance Standards for all uses (Section 21.21.040 of Chapter 21.21 Performance Standards of the City's Zoning Ordinance).
12. Storm water detention facilities must be provided with the development to mitigate the impact of increased storm water run-off and to improve the quality of the storm water run-off in accordance with a design approved by the City Engineer. A Storm Water Pollution Prevention Plan must be provided prior to issuance of a grading permit.
13. Prior to occupancy of any buildings, a cash deposit shall be paid to the City for the installation of the parkway landscaping in the right of way along Wisteria Lane and Germaine Way. The landscaping will be installed per the approved plans (on-file at the City) with the rest of the tract landscaping in the future.
14. Per Tract 2269 Conditions of Approval the following additional conditions shall apply:
 - a. Since this property is located in Area 3, Approach and Departure Zone of the Airport Land Use Plan (ALUP), the following conditions shall apply: (1) soundproofing where appropriate to reduce noise to acceptable levels in accordance with State guidelines; (2) no electro-magnetic transmissions which would interfere with operation of aircraft; (3) all bulk storage of volatile or flammable liquid be underground; (4) an avigational easement shall be required for uses; and (5) the number of persons using the facility kept to a minimum, in compliance with the ALUP.
 - b. Use of tree species such as London Plane with rapid growth characteristics and spread, shall be utilized in parking areas.
 - c. Provide one (1) fifteen (15) gallon size tree per five parking stalls shall be provided.
15. Provide fire sprinkler systems for residential, commercial, and industrial buildings.
16. Provide secondary emergency vehicle access sufficient to support the City's fire apparatus (HS-20 Truck Loading). Secondary vehicle access to be at least twenty (20) feet wide with no less than thirteen feet, six inches vertical clearance. All secondary emergency vehicle access surfaces shall provide all weather driving capabilities and conform to the requirements of City Zoning Codes.
17. Prior to the start of construction, documentation shall be submitted to Emergency Services showing that required fire flows can be provided to meet all project demands.

18. Storm water detention facilities must be provided with the development to mitigate the impact of increased storm water run-off and to improve the quality of the storm water run-off in accordance with a design approved by the City Engineer. A Storm Water Pollution Prevention Plan must be provided prior to issuance of a grading permit.

PASSED AND ADOPTED THIS 26th day of September, 2006 by the following Roll Call Vote:

AYES: Steinbeck, Withers, Flynn, Holstine, Menath, Johnson, Hamon
NOES: None
ABSENT: None
ABSTAIN: None

EXHIBIT A OF RESOLUTION 06-0077

**CITY OF EL PASO DE ROBLES STANDARD DEVELOPMENT CONDITIONS
FOR SINGLE FAMILY RESIDENTIAL TRACT AND PARCEL MAPS**

PROJECT #: Tentative Tract 2839

APPROVING BODY: Planning Commission

DATE OF APPROVAL: September 26, 2006

APPLICANT: JRW Group

LOCATION: Lot 12 of Tract 2269

The following conditions that have been checked are standard conditions of approval for the above referenced project. The checked conditions shall be complied with in their entirety before the project can be finalized, unless otherwise specifically indicated. In addition, there may be site specific conditions of approval that apply to this project in the resolution.

COMMUNITY DEVELOPMENT DEPARTMENT - The applicant shall contact the Planning Division, (805) 237-3970, for compliance with the following conditions:

A. GENERAL CONDITIONS

- ☒ 1. This project approval shall expire on September 26, 2008, unless a time extension request is filed with the Community Development Department prior to expiration.
- ☒ 2. The site shall be developed and maintained in accordance with the approved plans and unless specifically provided for through the Planned Development process, development shall comply with the Zoning Code, all other applicable City Ordinances, and applicable Specific Plans.
- ☒ 3. Prior to recordation of the map, all conditions of approval shall be completed to the satisfaction of the City Engineer and Community Developer Director or his designee.
- ☒ 4. This project is subject to the California Environmental Quality Act (CEQA), which requires the applicant submit a \$25.00 filing fee for the Notice of Determination payable to "County of San Luis Obispo". The fee should be submitted to the Community Development Department within 24 hours of project approval, which is then forwarded to the San Luis Obispo County Clerk. Please note that the project may be subject to court challenge unless the required fee is paid.
- ☒ 5. In accordance with Government Section 66474.9, the subdivider shall defend, indemnify and hold harmless the City, or its agent, officers and employees, from any claim, action or proceeding brought within the time period provided for in Government Code section 66499.37, against the City, or its agents, officers, or employees, to attack, set aside, void, annul the City's approval of this subdivision. The City will promptly notify subdivider of any such claim or action and will cooperate fully in the defense thereof.

- ☒ 6. All signs shall be subject to review and approval as required by Municipal Code Section 21.19 and shall require a separate application and approval prior to installation of any sign.
- ☒ 7. All existing and/or new lighting shall be shielded so as to be directed downward in such a manner as to not create off-site glare or adversely impact adjacent properties. The style, location and height of the lighting fixtures shall be submitted with the building plans and subject to approval by the Community Development Department.
- ☒ 8. All existing and/or new landscaping shall be installed with automatic irrigation systems.
- ☒ 9. All walls/fences and exposed retaining walls shall be constructed of decorative materials which include but are not limited to splitface block, slumpstone, stuccoed block, brick, wood, crib walls or other similar materials as determined by the Development Review Committee, but specifically excluding precision block.
- ☐ 10. The following areas shall be placed in a Landscape and Lighting District:

Parkway Landscape Strips
- ☐ 11. The following areas shall be permanently maintained by the property owner, Homeowners' Association, or other means acceptable to the City:

_____.
- ☐ 12. The applicant shall install durable, decorative fence/wall treatments and landscaping along all arterial streets consisting of brick, tubular steel with pilasters, or other similar materials as determined by the Development Review Committee, but specifically excluding precision block and wood fences. Substantial setbacks with landscaping may be considered as an alternative, subject to approval by the Development Review Committee.
- ☐ 13. The applicant shall provide a one-foot non-access easement along the rear/side of all lots that back up/side against a collector or arterial street.

B. THE FOLLOWING CONDITIONS SHALL BE COMPLETED PRIOR TO THE ISSUANCE OF BUILDING PERMITS OR RECORDATION OF THE FINAL MAP, WHICHEVER OCCURS FIRST:

- ☒ 1. Two sets of the revised Planning Commission approved plans incorporating all Conditions of Approval, standard and site specific, shall be submitted to the Community Development Department.
- ☒ 2. Prior to the issuance of building permits, the
 - ☒ Development Review Committee shall approve the following:
 - ☐ Planning Division Staff shall approve the following:
 - ☐ a. A detailed landscape plan including walls/fencing;
 - ☒ b. Other: See Condition No. 5 of PD Resolution.
- ☐ 3. The Covenants, Conditions, and Restrictions (CC&Rs) and/or Articles Affecting Real Property Interests are subject to the review and approval of the Community Development Department, the

Public Works Department and/or the City Attorney. They shall be recorded concurrently with the Final Map or prior to the issuance of building permits, whichever occurs first. A recorded copy shall be provided to the affected City Departments.

- ☒ 4. The applicant shall agree, in a manner acceptable to the City Attorney, to pay impact mitigation fees as may be established through a resolution or ordinance adopted by the City Council, in effect at the time building permits are issued.
- N/A 5. ~~In order for this tract/parcel map to be in conformance with the General Plan, the lots/parcels of the tract/parcel map shall be annexed into a Community Facilities District (CFD) that serves to mitigate impacts to public schools. Said CFD shall either be a joint City School District CFD or a CFD created by the School District that the City Council has approved. If at the time that the final map is submitted for approval, proceedings to annex the tract/parcel map into a CFD have not been completed, the applicant shall record on all lots/parcels, a waiver of future protest to the formation of a CFD joint City School District CFD or a CFD created by the School Districts that the City Council has approved. This condition shall not be imposed if the developer executes a development agreement with the District to mitigate school impacts.~~
- ☐ 6. Street names shall be submitted for review and approval by the Planning Commission, prior to approval of the final map.
- ☐ 7. The developer shall provide constructive notice to all buyers that all homes are required to utilize semi-automated trash containers as provided by the City's franchisee for solid waste collection.
- ☐ 8. The developer shall provide constructive notice to future buyers that all residential units shall be required to be equipped with trash compactors.
- ☐ 9. The applicant shall meet with the City's Crime Prevention Officer prior to the issuance of building permits for recommendations on security measures to be incorporated into the design of the structures to be constructed. The applicant is encouraged to contact the Police Department at (805) 237-6464 prior to plan check submittal.

PUBLIC WORKS DEPARTMENT - The applicant shall contact the Engineering Division, (805) 237-3860, for compliance with the following conditions:

APPLICANT: JRW Group
REPRESENTATIVE: Geo-West
PROJECT: Tentative Tract 2839

PREPARED BY: John Falkenstien
CHECKED BY:
TO PLANNING:

C. PRIOR TO ANY PLAN CHECK:

- ☒ 1. The applicant shall enter into an Engineering Plan Check and Inspection Services Agreement with the City.

D. PRIOR TO RECORDING OF THE FINAL OR PARCEL MAP:

- ☒ 1. The owner shall pay all Final Map fees, and current and outstanding fees for Engineering Plan Check and Construction and Inspection services and any annexation fees due.
- ☐ 2. If, at the time of approval of the final/record parcel map, any required public improvements have not been completed and accepted by the City the owner shall be required to enter into a Subdivision Agreement with the City in accordance with the Subdivision Map Act, prior to recordation. The owner shall also be required to post securities to guarantee the installation and completion of said improvements as specified in the Subdivision Map Act and submit a Certificate of Insurance as required by the City. The owner shall also be required to post securities for grading in accordance with Section 7008 of the Uniform Building Code, latest edition. This bond shall be of sufficient amount to ensure completion of the grading and drainage facilities. (A finding of "orderly development" has been made for this condition on parcel maps).

Bonds required and the amount shall be as follows:

Performance Bond.....100% of improvement costs.

Labor and Materials Bond.....50% of performance bond.

- ☒ 3. The developer shall annex to the City's Landscape and Lighting District for payment of the operating and maintenance costs of the following:
- ☒ a. Street lights;
 - ☒ b. Parkway and open space landscaping;
 - ☐ c. Wall maintenance in conjunction with landscaping;
 - ☐ d. Graffiti abatement;
 - ☐ e. Maintenance of open space areas.
- ☐ 4. The owner shall offer to dedicate to the City a 6 foot public utilities and 6 foot tree easement adjacent to all road right-of-ways. The owner shall offer to dedicate to the City the following easement(s). The location and alignment of the easement(s) shall be to the description and satisfaction of the City Engineer:
- ☐ a. Public Utilities Easement;
 - ☐ b. Water Line Easement;
 - ☐ c. Sewer Facilities Easement;
 - ☐ d. Landscape Easement;
 - ☐ e. Storm Drain Easement.

(Adopted by Planning Commission Resolution 94-038)

- ☐ 5. The subdivider shall offer to dedicate and improve the following street(s) to the standard indicated:
- ☒ 6. Landscape and irrigation plans for the public right-of-way shall be incorporated into the improvement plans and shall require a signature of approval by the Department of Public Works, Street Superintendent and the Community Development Department.
- ☒ 7. All improvement plans shall be prepared by a registered civil engineer and shall be submitted to the City Engineer for review and approval. The improvements shall be designed and placed to Public Works Department Standards and Specifications.
- ☒ 8. Prior to any site work a Preliminary Soils Report shall be prepared for the property to determine the presence of expansive soils or other soils problems and shall make recommendations regarding grading of the proposed site.
- ☒ 9. The applicant shall submit a composite utility plan signed as approved by a representative of each public utility, together with the improvement plans. The composite utility plan shall also be signed by the Water, Fire, Wastewater and Street Division Managers.
- ☒ 10. A complete grading and drainage plan prepared by a registered civil engineer shall be included with the improvement plans. Drainage calculations shall be submitted, with provisions made for on-site detention/ retention if adequate disposal facilities are not available, as determined by the City Engineer.
- ☐ 11. The owner shall provide an additional map sheet to record concurrently with the final map or parcel map showing the lot configuration, and the area subject to inundation by the 100 year storm with base flood elevations shown in feet, in relation to the National Geodetic Vertical Datum of 1929.
- ☒ 12. The owner shall install all utilities (sewer, water, gas, electricity, cable TV, and telephone) underground to each lot in the subdivision. Street lights shall be installed at locations as required by the City Engineer. All existing overhead utilities adjacent to or within the project shall be relocated underground, except for electrical lines 77 kilovolts or greater. All utilities shall be extended to the boundaries of the project, unless it is determined that no need for future extension exists. All underground construction shall be completed and approved by the City and the public utility companies, and the subgrade shall be scarified and compacted, before paving the streets.
- ☒ 13. Any utility trenching in existing streets shall be overlaid to restore a smooth riding surface as required by the City Engineer. Boring and jacking rather than trenching may be required on newly constructed or heavily traveled City Streets.
- ☒ 14. Prior to paving any street, the water and sewer systems shall successfully pass a City pressure test. The sewer system shall also be tested by a means of a mandrel and video inspection with a copy of the video tape provided to the City. No paving shall occur until the City has reviewed and viewed the sewer video tape and has determined that the sewerline is acceptable. Any repair costs to the pipeline including trench paving restoration shall be at the developer's expense.
- ☒ 15. The owner shall install all street name, traffic signs and traffic striping as directed by the City Engineer.
- ☐ 16. The adjoining existing City street is inadequate for the traffic generated by the project, or will be severely damaged by the construction. The applicant shall remove the entire roadway and replace it

with a minimum full half-width street plus a 12' wide travel lane and 8' wide base shoulder adequate to provide for two-way traffic. (A finding of "rough proportionality" has been made in the resolution for this condition.)

- ☐ 17. The development includes a phased street construction along the project boundary for future completion by the adjacent property owner, the applicant shall provide a minimum half-width street plus a 12' travel lane and 4' wide base shoulder adequate for two-way traffic. (A finding of "rough proportionality" has been made in the resolution for this condition.)
- ☐ 18. The project fronts on an existing street. The applicant shall pave-out from the proposed gutter to the edge of pavement if the existing pavement section is adequate, and shall feather the new paving out to the centerline for a smooth transition. If the existing pavement, structural sections or geometrics are inadequate per current City Standards, the roadway shall be replaced to centerline and the remaining pavement shall be overlaid. (A finding of "rough proportionality" has been made in the resolution for this condition.)

E. PRIOR TO ANY SITE WORK:

- ☒ 1. The applicant shall obtain a Grading Permit from the City Building Division.
- ☐ 2. Prior to issuance of a Grading Permit the developer shall apply, through the City, to FEMA and receive a Letter of Map Amendment (LOMA) issued from FEMA. The developer's engineer shall provide the required supporting data to justify the application.
- ☒ 3. Any existing Oak trees located on the project site shall be protected and preserved as required in City Ordinance No. 553, Municipal Code No. 10.01 "Oak Tree Preservation", unless specifically approved to be removed. An Oak tree inventory shall be prepared listing the Oak trees, their disposition, and the proposed location of any replacement trees required. In the event an Oak tree is designated for removal, an approved Oak Tree Removal Permit must be obtained from the City, prior to its removal.
- ☒ 4. All property corners shall be staked for construction control, and shall be promptly replaced if destroyed.
- ☒ 5. Any grading anticipated during the rainy season (October 15 to April 15) will require the approval of a construction zone drainage and erosion control plan to prevent damage to adjacent property. Appropriateness of areas shall be subject to City Engineer approval.
- ☐ 6. Any construction within an existing street shall require a traffic control plan. The plan shall include any necessary detours, flagging, signing, or road closures requested. Said plan shall be prepared and signed by a registered civil or traffic engineer.

F. PRIOR TO ISSUANCE OF A BUILDING PERMIT:

- ☒ 1. A final soils report shall be submitted to the City prior to the final inspection and shall certify that all grading was inspected and approved, and that all work has been done in accordance with the plans, preliminary report, and Chapter 70 of the Uniform Building Code.
- ☒ 2. The applicants civil and soils engineer shall submit a certification that the rough grading work has been completed in substantial conformance to the approved plans and permit.

- ☒ 3. Building permits shall not be issued until the water system has been completed and approved, and a based access road installed sufficient to support the City's fire trucks, in a manner approved by the Fire Chief.
- ☐ 4. Prior to issuance of a Building Permit for building within Flood Insurance Rate Map (FIRM) zones A1-A30, AE, AO, AH, A, V1-V30, VE and V, the developer shall provide an Elevation Certificate in accordance with the National Flood Insurance program. This form must be completed by a land surveyor, engineer or architect licensed in the State of California.
- ☐ 5. Prior to issuance of a Building Permit for building within Flood Insurance Rate Map (FIRM) zones A1-A30, AE, AO, AH, A, V1-V30, VE and V, the developer shall provide a Flood Proofing Certificate in accordance with the National Flood Insurance program. This form must be completed by a land surveyor, engineer or architect licensed in the State of California.

G. PRIOR TO ISSUANCE OF CERTIFICATE OF OCCUPANCY:

- ☒ 1. All final property corners and street monuments shall be installed before acceptance of the public improvements.
- ☒ 2. No buildings shall be occupied until all public improvements are completed and approved by the City Engineer, and accepted by the City Council for maintenance.
- ☒ 3. All disturbed areas not slated for development shall be protected against erosion in a manner acceptable to the City Engineer, which may include hydroseeding or landscaping.
- ☒ 4. The applicant shall pay any current and outstanding fees for Engineering Plan Checking and Construction Inspection Services and any outstanding annexation fees.
- ☒ 5. All top soil removed shall be stockpiled and evenly distributed over the slopes and lots upon completion of rough grading to support hydroseeding and landscaping. All slope areas shall be protected against erosion by hydroseeding or landscaping.
- ☒ 6. All construction refuse shall be separated (i.e. concrete, asphalt concrete, wood, gypsum board, etc.) and removed from the project to a recycling facility in accordance with the City's Source Reduction and Recycling Element.
- ☐ 7. If any of the public improvements or conditions of approval are not completed or met, then the subdivider may, at the discretion of the City Engineer, enter into a Performance Agreement with the City to complete said improvements at a later date and post securities to cover the cost of the improvements. The form of the agreement and amount of the securities are subject to the approval of the City Engineer.
- ☒ 8. A blackline clear Mylar (0.4 MIL) copy and two (2) blue line prints of as-built improvement plans, signed by the engineer of record, shall be provided to the City Engineer prior to the final inspection. A reduced copy (i.e. 1" = 100') of the composite utility plan shall be provided to update the City's Atlas Map.
- ☒ 9. A benchmark shall be placed for vertical control on the U.S.G.S. Datum as required by the City Engineer.

PASO ROBLES FIRE DEPARTMENT - The applicant shall contact the Fire Department, (805) 237-3973, for compliance with the following conditions:

(Adopted by Planning Commission Resolution 94-038)

H. GENERAL CONDITIONS

- ☒ 1. Fire hydrants shall be installed at intervals as required by the Fire Chief and City Engineer. The maximum spacing for single family residential shall be 500 feet. The maximum spacing for multi-family and commercial/residential shall be 300 feet. On-site hydrants shall be placed as required by the Fire Chief.
- ☒ 2. Building permits shall not be issued until the water system, including hydrants, has been tested and accepted and a based access road installed sufficient to support the City's fire apparatus (HS-20 truck loading). The access road shall be kept clear to a minimum of 24 feet at all times and shall be extended to each lot and shall be maintained to provide all weather driving conditions.
- ☒ 3. No buildings shall be occupied until all improvements are completed and accepted by the City for maintenance.
- ☒ 4. If the development includes phased street construction, temporary turn-arounds shall be provided for streets that exceed 150 feet in length. The temporary turn around shall meet City requirements as set forth in the Public Works Department Standards and Specifications.
- ☐ 5. All open space areas to be dedicated to the City shall be inspected by the Fire Department prior to acceptance. A report shall be submitted recommending action needed for debris, brush and weed removal and tree trimming. The developer shall clean out all debris, dead limbs and trash from areas to be recorded as open space prior to acceptance into a Benefit Maintenance District.
- ☐ 6. Any open space included in a private development shall be subject to the approval of a vegetation management plan approved by the Fire Chief.
- ☒ 7. Each tract or phase shall provide two sources of water and two points of access unless otherwise determined by the Fire Chief and Public Works Director.
- ☒ 8. Provisions shall be made to update the Fire Department Run Book.
