

RESOLUTION NO. 15-012
A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF PASO ROBLES
APPROVING A NEGATIVE DECLARATION FOR
PLANNED DEVELOPMENT 12-006 AMENDMENT
(FIRESTONE BREWERY)
APNs: 009-633-032, 013, 014, 015, 020, 021 & 022

WHEREAS, the project is located at 1400 Ramada Drive; and

WHEREAS, to request is to construct a 9,000 square foot expansion to the existing 19,500 square foot building (old Nu-Way Cleaners building) for office and warehouse uses, and construct a new 55,000 square foot warehouse with a 39 space surface parking lot; and

WHEREAS, the General Plan designation for this site is Business Park (BP) and is zoned Manufacturing, Planned Development Overlay (M-PD); and

WHEREAS, an Initial Study was prepared for this project (attached as Exhibit A), which concludes that the project as proposed will not have significant impacts on the environment; and

WHEREAS, Public Notice of the proposed Negative Declaration was given as required by Section 21092 of the Public Resources Code; and

WHEREAS, public hearings were conducted by the Planning Commission on June 23, 2015 to consider the Initial Study prepared for this application, and to accept public testimony regarding this proposed environmental determination for the proposed zoning modification; and

WHEREAS, based on General Plan Land Use Designation, the 2003 General Plan Environmental Impact Report, information contained in the Initial Study prepared for this zoning modification, the staff report and testimony received as a result of the public notice, the City Council finds no substantial evidence that the project would have a significant impact on the environment.

NOW, THEREFORE, BE IT RESOLVED:

1. That the above Recitals are true and correct and incorporated herein by reference.
2. That based on the City's independent judgment, the Planning Commission of the City of El Paso de Robles does hereby approve a Negative Declaration for PD 12-006 Amendment, in accordance with the California Environmental Quality Act.

PASSED AND ADOPTED THIS 23rd day of June, 2015 by the following roll call vote:

AYES: Barth, Donaldson, Brennan, Cooper, Rollins, Vanderlip

NOES:

ABSENT:

ABSTAIN: Burgett

ATTEST:

WARREN FRACE, COMMISSION SECRETARY

VINCE VANDERLIP, CHAIRMAN

ENVIRONMENTAL INITIAL STUDY CHECKLIST FORM CITY OF PASO ROBLES

1. **PROJECT TITLE:** PD 12-006 Amendment -Firestone Brewery – Building Expansion and New Warehouse

 Concurrent Entitlements: PD 12-006
2. **LEAD AGENCY:** City of Paso Robles
 1000 Spring Street
 Paso Robles, CA 93446

 Contact:
 Phone: (805) 237-3970
 Email:
3. **PROJECT LOCATION:** 1385 Vendels Circle
4. **PROJECT PROPONENT:** Harris Architecture & Design

 Contact Person: Kyle Harris (Representative)

 Phone: (805) 574-1550
 Email: Kyle@Harrisaandd.com
5. **GENERAL PLAN DESIGNATION:** BP (Business Park)
6. **ZONING:** M –PD (Manufacturing, PD Overlay)
7. **PROJECT DESCRIPTION:**
 Planned Development 12-006 Amendment: a request to construct an approximate 9,000 square foot expansion to an existing 19,500 square foot building for office and warehouse uses. This addition would take place in an area that has been an asphalt parking lot for the existing building. Also proposed, is the construction of a new 55,000 square foot warehouse and 39 space surface parking lot. The new building would be built on an approximate 3-acre vacant site.
8. **ENVIRONMENTAL SETTING:** The 3- acre site is vacant and currently being utilized for outdoor storage of materials and equipment related to the existing brewery and on-going construction of brewery expansion areas. There is a large oak tree located on the north east corner of the site which was previously determined to be diseased beyond correction and subsequently approved for removal by the City Council. The Council's approval of the tree removal was in relation to a previously approved project on this site that would have developed new industrial buildings. The project was not built and the tree has not been removed, but would be removed as part of the development of this proposed project.
9. **OTHER AGENCIES WHOSE APPROVAL IS REQUIRED (AND PERMITS NEEDED):** None.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|---|---|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Geology /Soils |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Hydrology / Water Quality |
| <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Noise |
| <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Public Services | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Transportation/Traffic | <input type="checkbox"/> Utilities / Service Systems | <input type="checkbox"/> Mandatory Findings of Significance |

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- ☒ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Signature: _____

Date: 6/3/15

EVALUATION OF ENVIRONMENTAL IMPACTS:

1. A brief explanation is required for all answers except “No Impact” answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A “No Impact” answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A “No Impact” answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
2. All answers must take account of the whole action involved. Answers should address off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
3. “Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. “Potentially Significant Impact” is appropriate if there is substantial evidence that an effect may be significant. If there are one or more “Potentially Significant Impact” entries when the determination is made, an EIR is required.
4. “Negative Declaration: Less Than Significant With Mitigation Incorporated” applies where the incorporation of mitigation measures has reduced an effect from “Potentially Significant Impact” to a “Less Than Significant Impact.” The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from “Earlier Analyses,” as described in (5) below, may be cross-referenced).
5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
7. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
8. The explanation of each issue should identify:
 - a. the significance criteria or threshold, if any, used to evaluate each question; and
 - b. the mitigation measure identified, if any, to reduce the impact to less than significance

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS: Would the project:				
a. Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially degrade the existing visual character or quality of the site and its surroundings?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Discussion (a-c): The project is located adjacent to State Highway 101 and will be quite prominent from both north and southbound Highway 101. The portion of Highway 101 through the City is not considered a scenic vista, or scenic highway. The proposed development has been designed to provide enhanced architectural elements for the architectural elevations that face Ramada Drive and Highway 101. The west facing elevation of the 55,000 square foot warehouse is 300 feet in length which is parallel to the adjacent street and Highway 101. The building architecture has provided tower elements, trellis structures, awnings, columns, and colors and materials that are used throughout the Firestone Brewery campus.

The building is setback from the back of the sidewalk along Ramada Drive approximately 40-feet. The 40-foot area will be landscaped.

As a result of the architectural design of the building, along with the 40-foot planter area, impacts from the development of the buildings in relation to scenic views and visual character on the surrounding areas will be less than significant.

d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? (Sources: 1, 2, 10)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
---	--------------------------	--------------------------	--------------------------	-------------------------------------

Discussion: Any new exterior lighting will be required to be shielded so that it does not produce off-site glare.

II. AGRICULTURE AND FOREST RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--	--------------------------	--------------------------	--------------------------	-------------------------------------

Discussion: The project is not located on agriculturally zoned land and there are no agricultural activities taking place on the site.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See discussion section for Section II.a.				
c. Conflict with existing zoning for, or cause rezoning of, forest, land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 5114(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The project is not located on agriculturally zoned land and there are no agricultural activities taking place on the site.				
d. Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The project is not located on land zoned for forest purposes.				
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: This project would not result in the conversion of farmland or forest land.				

III. AIR QUALITY: Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

- a. Conflict with or obstruct implementation of the applicable air quality plan? (Source: 11)
- | | | | |
|--------------------------|--------------------------|-------------------------------------|--------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|--------------------------|--------------------------|-------------------------------------|--------------------------|

Discussion: The San Luis Obispo County area is a non-attainment area for the State standards for ozone and suspended particulate matter. The SLO County Air Pollution Control District (APCD) administers a permit system to ensure that stationary sources do not collectively create emissions which would cause local and state standards to be exceeded. The potential for future project development to create adverse air quality impacts falls generally into two categories: Short term and Long term impacts.

Short term impacts are associated with the grading and development portion of a project where earth work generates dust, but the impact ends when construction is complete. Long term impacts are related to the ongoing operational characteristics of a project and are generally related to vehicular trip generation and the level of offensiveness of the onsite activity being developed.

There will be short term impacts associated with grading for the proposed construction, standard conditions required by the City as well as the APCD will be implemented.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
According to the APCD CEQA Handbook, when comparing the project to Table 1-1, Screening Criteria for Project Air Quality Analysis, the proposed new 55,000 square foot warehouse building, along with the 9,000 square foot expansion to the existing warehouse building, would produce less than the 25 lbs/day of ROG+NO _x , and there for be considered less than significant. No mitigation is required for operational or long-term impacts based on light-industrial or manufacturing type of land use. Standard dust control measures related to the grading activities will be applied to this project.				
b. Violate any air quality standard or contribute substantially to an existing or projected air quality violation? (Source: 11)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See Section III.a				
c. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? (Source: 11)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See Section III.a				
d. Expose sensitive receptors to substantial pollutant concentrations? (Source: 11)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: Besides the short term impacts from the actual grading, there will not be a significant impact to sensitive receptors from the warehouse and office uses.				
e. Create objectionable odors affecting a substantial number of people? (Source: 11)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: There will be no objectionable odors in relation to the proposed warehouse use.				

IV. BIOLOGICAL RESOURCES: Would the project:

- | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Discussion (a-f):

The subject site has been improved by the adjacent public improvements which include street, curb, gutter and sidewalk improvements on all sides except for the north side. Industrial buildings have been developed on the north, south and east sides of the site. State Highway 101 and Ramada Drive are located adjacent to the site along the west boundary. There is a large oak tree located on the north east corner of the site. The tree was determined to be in poor health and was approved for removal by the City Council in conjunction with the development of a previous project on the subject site. The tree is still located on the lot; the previous project was never developed. The applicants plan on removing the tree with development of this project.

Since this lot has been developed, including street improvements and utilities and since the lot is flat and has no resources except for seasonal grasses, the development of the 3-acre site will not have an impact on biological services.

V. CULTURAL RESOURCES: Would the project:

a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d. Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Discussion (a-d):

The site is an infill site that is surrounded by existing industrial buildings and adjacent streets. The site has been previously graded with the development of the industrial area and installation of the streets.

In the event that buried or otherwise unknown cultural resources are discovered during construction work in the area of the find, work shall be suspended and the City of Paso Robles should be contacted immediately, and appropriate mitigations measures shall be developed by qualified archeologist or historian if necessary, at the developers expense.

VI. GEOLOGY AND SOILS: Would the project:

- a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:

- i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. (Sources: 1, 2, & 3)

☐ ☐ ☒ ☐

Discussion: The potential for and mitigation of impacts that may result from fault rupture in the project area are identified and addressed in the General Plan EIR, pg. 4.5-8. There are two known fault zones on either side of the Salinas Rivers valley. The Rinconada Fault system runs on the west side of the valley, and grazes the City on its western boundary. The San Andreas Fault is on the east side of the valley and is situated about 30 miles east of Paso Robles. The City of Paso Robles recognizes these geologic influences in the application of the Uniform Building Code to all new development within the City. Review of available information and examinations indicate that neither of these faults is active with respect to ground rupture in Paso Robles. Soils and geotechnical reports and structural engineering in accordance with local seismic influences would be applied in conjunction with any new development proposal. Based on standard conditions of approval, the potential for fault rupture and exposure of persons or property to seismic hazards is not considered significant. There are no Alquist-Priolo Earthquake Fault Zones within City limits.

- ii. Strong seismic ground shaking? (Sources: 1, 2, & 3)

☐ ☐ ☒ ☐

Discussion: The proposed project will be constructed to current CBC codes. The General Plan EIR identified impacts resulting from ground shaking as less than significant and provided mitigation measures that will be incorporated into the design of this project including adequate structural design and not constructing over active or potentially active faults.

- iii. Seismic-related ground failure, including liquefaction? (Sources: 1, 2 & 3)

☐ ☐ ☒ ☐

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p><i>Discussion: Per the General Plan EIR, the project site is located in an area with soil conditions that have a potential for liquefaction or other type of ground failure due to seismic events and soil conditions. To implement the EIR's mitigation measures to reduce this potential impact, the City has a standard condition to require submittal of soils and geotechnical reports, which include site-specific analysis of liquefaction potential for all building permits for new construction, and incorporation of the recommendations of said reports into the design of the project</i></p>				
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See discussions above.				
b. Result in substantial soil erosion or the loss of topsoil? (Sources: 1, 2, & 3)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p><i>Discussion: Per the General Plan EIR the soil condition is not erosive or otherwise unstable. As such, no significant impacts are anticipated. A geotechnical/ soils analysis will be required prior to issuance of building permits that will evaluate the site specific soil stability and suitability of grading and retaining walls proposed. This study will determine the necessary grading techniques that will ensure that potential impacts due to soil stability will not occur. An erosion control plan shall be required to be approved by the City Engineer prior to commencement of site grading.</i></p>				
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Discussion: See response to item a.iii, above.				
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Discussion: See response to item a.iii, above.				
e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The building will be hooked up to the City's sanitary sewer system, therefore there is no impact.				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------------	---	------------------------------------	--------------

VII. GREENHOUSE GAS EMISSIONS: Would the project:

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b. Conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gasses? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Discussion (a-b):

The use of the buildings includes warehousing, which is a low traffic generator, as well as having a minimal number of full and part time employees. Additionally, the new facility is being located adjacent to Firestone Brewery's existing facility which will eliminate the need to haul product by truck between buildings. Propane powered fork lifts will be used to transport product and materials between the Firestone Brewery buildings.

Based on the warehouse use being a low traffic generator and based on the 55,000 square foot warehouse building and the 9,000 square foot expansion to the existing warehouse building, when reviewing the project with the APCD CEQA Handbook Table 3.4, since the project would produce less than the 25 lbs/day of ROG+NOx & PM10, and therefore be considered less than significant related to Greenhouse Gas Emissions and no mitigation is required.

VIII. HAZARDS AND HAZARDOUS MATERIALS: Would the project:

- | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Discussion (a-d): the warehouse will be used for the storage of case beer and keg beer. No brewing activities will take place with this project, therefore the project would not create a hazard, or use/produce hazardous materials, therefore, there will be no impact.				
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion (e): the project is not located in proximity to the airport, therefore there is no impact.				
f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion (f): There are no know private air strips in the vicinity of the project site, therefore there is no impact.				
g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion (g,h): The development of the facility within the existing industrial park will not expose people to wildland fires, and is not adjacent to wildlands, therefore there will not be an impact.				

IX. HYDROLOGY AND WATER QUALITY: Would the project:

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a. Violate any water quality standards or waste discharge requirements? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

Discussion: The proposed project is designed to retain stormwater on-site or on adjacent Firestone Brewery properties, through installation of various low-impact development (LID) features. The project has been designed to reduce impervious surfaces, preserve existing vegetation, and promote groundwater recharge by employing bioretention through implementation of these measures. Thus, water quality standards will be maintained and discharge requirements will be in compliance with State and local regulations. Therefore, impacts to water quality and discharge will be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., Would the production rate of pre-existing nearby wells drop to a level which would not support existing land uses or planned uses for which permits have been granted)? Would decreased rainfall infiltration or groundwater recharge reduce stream baseflow? (Source: 7)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The proposed expansion to the existing building and the development of the 55,000 square foot warehouse building will be served by city water and sewer, therefore the project will not have an impact on this environmental factor.				
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site? (Source: 10)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site? (Source: 10)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff? (Source: 10)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Discussion (c-f): Discussion: based on the site being flat and considered infill site located within an existing industrial park, that includes existing storm water drainage facilities, the development of this project will not alter existing drainage patterns and is not in the vicinity of a stream or river, so it will not contribute to erosion. The development of the site will provide the necessary on-site drainage facilities to insure site drainage is directed to the nearby drainage facilities and will not substantially increase the rate and amount of surface runoff which would result in flooding. The proposed expansion to the existing building and the development of the 55,000 square foot warehouse building will not have an impact on this environmental

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
factor.				
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h. Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
j. Inundation by mudflow?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion (g-j): the project is not located within a 100 year flood hazard area, and as mentioned above in Section f. the site is part of an existing industrial park that has existing drainage facilities and storm water system. The site is not located within an area that would be affected by a failure of a levee or dam.				
k. Conflict with any Best Management Practices found within the City's Storm Water Management Plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
l. Substantially decrease or degrade watershed storage of runoff, wetlands, riparian areas, aquatic habitat, or associated buffer zones?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Discussion (a-l):

The Regional Water Quality Control Board adopted storm water management requirements for development projects in the Central Coast region. Upon the Board's direction, the City has adopted a Storm Water Ordinance requiring all projects to implement low impact development best management practices to mitigate impacts to the quality of storm water run-off and to limit the increase in the rate and volume of storm water run-off to the maximum extent practical.

These new requirements include on-site retention of stormwater. The applicant will be preparing a storm water control plan offering a site assessment of constraints and opportunities and corresponding storm water management strategies to meet stormwater quality treatment and retention requirements in compliance with the regulations. The grading plan reflects these requirements with the development of bio-retention treatment areas. It is anticipated that based on the size of the building in relation to the Parcel, that storm water retention facilities that exist on the properties to the east, also owned by Firestone Brewery will need to be utilized.

The site is relatively flat and will be designed to take storm water to the western edge of the site along Ramada Drive, where bio-swales will be constructed to handle the storm water. Low Impact Design measures will be used to retain the water on site and allow for water to meter out to the storm drain after being taken

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
through vegetation to allow for cleansing. Additionally the site is not located within a flood hazard area and the subject buildings will be utilizing City water and sewer systems. The projects impacts related to hydrological and water quality issues will be less than significant since the project will be required to comply with the City's standards related to site drainage, storm water run-off, water quality and water supply.				

X. LAND USE AND PLANNING: Would the project:

- | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Physically divide an established community? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: The project consists of constructing warehouse buildings on a site within an existing industrial/business park: it will not divide an established community.

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion:

Warehousing is a permitted use in the Manufacturinig (M) zoning and Business Park (BP) land use designation of the Zoning Code and General Plan. Therefore, there will not be impacts to land use plans or policies.

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| c. Conflict with any applicable habitat conservation plan or natural community conservation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: There are no habitat conservation plans or natural community conservation plans established in this area of the City. Therefore there is no impact.

XI. MINERAL RESOURCES: Would the project:

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?
(Source: 1) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: There are no known mineral resources at this project site.

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? (Source: 1) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: There are no known mineral resources at this project site.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XII. NOISE: Would the project result in:				
a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? (Source: 1)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The warehouse activities take place within the building and at the truck loading docks. The building is located within an existing industrial park where there are no sensitive receptors. The proposed warehouse project will not expose people to noise levels in excess of applicable standards, therefore there is no impact.				
b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Discussion: There may be temporary vibrations related to the grading and compaction of the site in preparation for construction. The construction phase of the project will be required to comply with the City's noise level requirements, including hours of construction activity, and as a result of these standard construction requirements, impacts from vibrations as a result of construction activity will be less than significant.				
c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See section XIIa				
d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: See section XIIa				
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? (Sources: 1, 4)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion: The project is not located within the Airport Land Use Plan area.				

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------------	---	------------------------------------	--------------

XIII. POPULATION AND HOUSING: Would the project:

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? (Source: 1) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Discussion (a-c):

The project will not create induce population growth, displace housing or people.

XIV. PUBLIC SERVICES: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a. Fire protection? (Sources: 1,10) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b. Police protection? (Sources: 1,10) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| c. Schools? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| d. Parks? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| e. Other public facilities? (Sources: 1,10) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

Discussion (a-e):

The project will be located within an existing industrial/business park. The addition of the building will not create a significant impact to public services.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XV. RECREATION				
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Discussion (a&b): The project will not impact recreational facilities.				

XVI. TRANSPORTATION/TRAFFIC: Would the project:

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a. Conflict with an applicable plan, ordinance or policy establishing measures or effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b. Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Discussion (a,b): A Trip Generation Analysis was prepared for the project by Associated Traffic Engineers (ATE). The analysis indicated that the project would generate a total of 263 average daily trips, 25A.M. peak hour trips, and 27P.M. peak hour trips.

The City Engineer has indicated that a previous project that was entitled for the subject site (Lavorgna) made financial contributions for improvements that have been constructed for the southbound off-ramp and the intersection of Highway 101 and Highway 46 West. The peak hour trips for this project are less than the trips that were calculated for the previous Lavorgna project, and that the previous financial contribution to the interchange mitigates this project's traffic impact, therefore no further mitigation is necessary. This project will be required to pay the Transportation Impact Fees as required by all development projects. As a result of the contributions made to the Highway 101 and Highway 46 West interchange by the previous project, and the requirement for the new project to pay Transportation Impact Fees, this projects impact on transportation and traffic will be less than significant.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks? Discussion (c): The development of this project within the established industrial subdivision will not impact air traffic patterns or increase air traffic levels.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? Discussion (d): The development of the proposed buildings will help the operations of the brewery facility by providing additional warehousing separate from the existing brewery buildings. This will help reduce the amount of fork lift and truck traffic that currently operates between the existing buildings via the public street. While there will be trucks entering and leaving the loading docks for the warehouse buildings, it is not anticipated that it will create a hazardous situation and therefore it would be a less than significant impact.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Result in inadequate emergency access? Discussion (e): The project has been reviewed by the City's Emergency Services Department, and based on the property having multiple access points to multiple streets, the ability for emergency access to the site is acceptable, and therefore considered adequate.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities? Discussion (a-f): The development of this project within an established industrial park would not conflict with adopted public transit, bicycle or pedestrian facilities, or decrease performance or safety of the facilities.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

XVII. UTILITIES AND SERVICE SYSTEMS: Would the project:

a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Discussion: The project will comply with all applicable wastewater treatment requirements as required by the City, the Regional Water Quality Control Board, and the State Water Board. Therefore, there will be less than significant impacts resulting from wastewater treatment from this project.				
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------------	---	------------------------------------	--------------

environmental effects?

Discussion: The proposed 9,000 square foot expansion to the existing building and the development of the 55,000 square foot warehouse building will be for product storage purposes. Since the storage of products would not produce waste water or have a need for new water beyond typical plumbing facilities, the project impact on this environmental factor, will be less than significant.

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

Discussion: (c): The project is located within an existing industrial subdivision where the infrastructure including storm drain systems have been installed. This project will need to provide new Low Impact Design storm water drainage facilities such as bio-retention areas that will include retention basins on site and as a result of the size of the building in relation to the lot, the project will need to utilize existing retention area on properties to the east also owned by Firestone Brewery. With the development new and updates to existing drainage facilities, it is not anticipated that there will be significant impacts on drainage facilities.

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|

Discussion: As noted in section IX on Hydrology, the project can be served with existing water resource allocations available and will not require expansion of new water resource entitlements, additionally the proposed warehouse and office uses have a low water demand, therefore this projects impact on water demand is less than significant.

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| e. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

Discussion: The proposed 9,000 square foot expansion to the existing building and the development of the 55,000 square foot warehouse building will be for product storage purposes. Since the storage of products would not produce waste water or have a need for new water beyond typical plumbing facilities, the project will not have an impact on this environmental factor.

- | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|
| f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: Per the City's Landfill Master Plan, the City's landfill has adequate capacity to accommodate construction-related and operational solid waste disposal for this project.

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| g. Comply with federal, state, and local statutes and regulations related to solid waste? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

Discussion: The project will comply with all federal, state, and local solid waste regulations.

Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------------	---	------------------------------------	--------------

XVIII. MANDATORY FINDINGS OF SIGNIFICANCE

- a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

☐
☐
☒
☐

Discussion: The proposed 9,000 square foot expansion to the existing building and the development of the 55,000 square foot warehouse building will be for product storage purposes constructed on vacant lot located within an existing industrial park. The development of this project on the infill, therefore impacts to fish, wildlife, of plant habitat is less than significant.

- b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

☐
☐
☒
☐

Discussion: The proposed 9,000 square foot expansion to the existing building and the development of the 55,000 square foot warehouse building will be for product storage purposes constructed on vacant lot located within an existing industrial park. The development of this project on the existing infill lot, will not have impacts that are individually limited, but cumulatively considerable.

- c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

☐
☐
☒
☐

Discussion: The proposed 9,000 square foot expansion to the existing building and the development of the 55,000 square foot warehouse building will be for product storage purposes constructed on vacant lot located within an existing industrial park. The development of this project on the existing infill lot will not cause substantial adverse effects to human beings, either directly or indirectly.

EARLIER ANALYSIS AND BACKGROUND MATERIALS.

Earlier analyses may be used where, pursuant to tiering, program EIR, or other CEQA process, one or more effects have been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c)(3)(D).

TRIP GENERATION ANALYSIS FOR THE FIRESTONE WAREHOUSE EXPANSION - PASO ROBLES, CALIFORNIA

The following letter presents the trip generation analysis prepared for the Firestone Warehouse Expansion in the City of Paso Robles. As shown on the attached site plan, the proposed expansion includes a new 55,000 square foot cold storage warehouse and 8,990 square feet of office/warehouse space addition to the existing Laundry/Warehouse Building (Building #7).

Project Trip Generation

Trip generation estimates calculated for the Firestone Warehouse Expansion are based on the rates published in the Institute of Transportation Engineers, Trip Generation, 9th Edition for Warehouse (Land Use Code #150) and Single Tenant Office Building (Land Use Code #715). Table 1 summarizes the average daily trips (ADT), A.M. and P.M. peak hour trips.

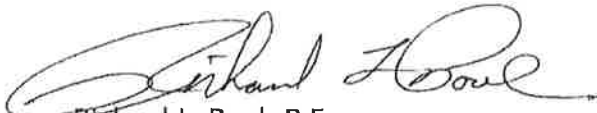

Attachment 7
Trip Generation Letter
PD 12-006 Amendment
(Firestone Brewery)

Table 1
Firestone Warehouse Expansion Trip Generation Estimates

Land Use	Size	Average Daily Trips		A.M. Peak Hour		P.M. Peak Hour	
		Rate	Trips	Rate	Trips	Rate	Trips
<u>New Building:</u> Warehouse	55,000 SF	3.56	196	0.30	16 (13/3)	0.32	18 (4/14)
<u>Building #7 Expansion:</u> Office	4,390 SF	11.65	51	1.80	8 (7/1)	1.74	8 (1/7)
Warehouse	4,600 SF	3.56	16	0.30	1 (1/0)	0.32	1 (0/1)
Total:			263		25 (21/4)		27 (5/22)

The data presented in Table 1 show that the proposed warehouse expansion would generate a total of 263 average daily trips, 25 A.M. peak hour trips, and 27 P.M. peak hour trips.
